Subject: Consultation on Urgent Modification Proposal P10  
Importance: High

Dear Recipient

In accordance with the procedures set out in section F2.9 of the Balancing and Settlement Code, NGC has recommended to the Gas and Electricity Markets Authority ('the Authority') that Modification Proposal P10 (Eliminating Imbalance Price Spikes Caused by Truncating Effects, proposed by NGC) be treated as an Urgent Modification Proposal. The Authority has granted consent for this course of action.

The process approved by the Authority was that ELEXON should convene a group of experts to assess this proposal, with a view to submitting a Modification Report to the Authority by Friday 11 May 2001. Accordingly, a Modifications Group was convened on 09 May. The Group comprised ELEXON technical experts, NGC representatives, Ofgem representatives and industry experts. Following discussion at the Modifications Group meeting, the attached draft Urgent Modification Report was produced and is now being issued for consultation. Apologies for the delay in sending out the report this was due to a power failure at the ELEXON offices.

You are invited to:

review the attached report and provide comments (in particular section 8 Recommendations. 2 issues are brought to your attention that were not raised at the Modification Group meeting);

provide an indication of support for the recommended solution to the issue raised within Modification Proposal P10; and

provide a view on an implementation date/approach for a solution.

<<File: P10\_Urgent\_Report.doc>> <<File: P10\_Urgent\_Report.pdf>>

Please send your representations by 8am. on Friday 11 May to the following e-mail address:

modifications@elexon.co.uk

Please entitle your e-mail 'P10 Modification Report Comments'

Received responses will be collated and, along with the Final Modification Report, presented to the Authority on Friday 11 May.

The attached report will also be placed on the BSC Website ([www.elexon.co.uk](http://www.elexon.co.uk)).

Thank you.
