

**Draft Change Proposal – BSCP40/01**

DCP No: 0023

*Version No: 1.0  
(mandatory by BSCCo)*

**Title** *(mandatory by originator)*

Movement of the functional requirements within PSL120 'Non Half Hourly Data Collection' to BSCP504 'Non Half Hourly Data Collection for SVA Metering Systems registered in the SMRS', following the creation of a generic non functional PSL (PSL100) via CP1182.

**Description of Problem/Issue** *(mandatory by originator)*

The Code Subsidiary Document (CSD) review has highlighted that there is a large amount of duplication between the requirements contained in Party Service Lines (PSLs) and the corresponding Balancing and Settlement Code Procedures (BSCPs).

During a consultation as part of the CSD review, industry participants were asked whether the functional requirements of PSLs should be merged into the appropriate BSCP and a single PSL created containing non functional requirements relevant to all Party Agents. The majority of respondents to the consultation agreed with this recommendation.

The Panel were asked to agree the recommendations of the CSD review and the CSD Architecture Principles Document at their meeting on 8 June 2006 (Panel 115/08). The Panel agreed that a single PSL should be created containing the non-functional requirements and the functional requirements in the existing PSLs should be merged into the relevant BSCPs.

A single generic PSL (PSL100) has been created containing participants non-functional requirements.

Following on from CP1182, the functional requirements from PSL120 'Non Half Hourly Data Collection' should be moved into BSCP504 'Half Hourly Data Collection for SVA Metering Systems registered in the SMRS'.

**Justification for Change** *(mandatory by originator)*

This change will remove the duplication between PSL120 and BSCP504; and will mean that Non Half Hourly Data Collectors will only have to look in one place to find the functional requirements relating to their role. This may be particularly useful to new entrants. It will also reduce the cost associated with preparing and maintaining numerous and duplicated PSLs.

<b>Draft Change Proposal – BSCP40/01</b>	DCP No: 0023  <i>Version No: 1.0</i> <i>(mandatory by BSCCo)</i>
<p><b>Proposed Solution(s)</b> <i>(mandatory by originator)</i></p> <p>Changes should be made to BSCP504 to include all of the functional requirements currently included in PSL120, as well as a summary of the NHHDC requirements that are stated in the BSC itself. Redlining to suggest where requirements currently in PSL120 should sit within BSCP504 is attached to this DCP (Attachment A).</p> <p>It is noted that this change may require additional more minor changes to other CSDs. This additional redlining will be included in the final version of this CP.</p> <p>A housekeeping modification will be needed to update/remove references to PSL120 within the BSC before PSL120 is entirely removed. For efficiency, it is anticipated that a single housekeeping modification will be used to update all of the PSL references when all of the functional requirements in the PSLs have been moved into BSCPs.</p>
