

Change Proposal – BSCP40/02	CP No: 1327 <i>Version No: v1.0 (mandatory by BSCCo)</i>
Title <i>(mandatory by originator)</i> Inclusion of a new MDD Entity 27 (Clock Interval) form in BSCP509	
Description of Problem/Issue <i>(mandatory by originator)</i> Market Domain Data (MDD) entity forms provide a view of what data items needs to be amended or included for a particular version of MDD. There are presently 62 entity forms listed in BSCP509 ‘Changes To Market Domain Data’ . Currently the entity 27 form is not included in the list of forms in this BSCP. To allow participants make submissions related to this change, a historic spreadsheet form was created to allow participants to fill in the relevant information for the change. This spreadsheet is provided only when changes relating to new Standard Settlement Configuration (SSC) and associated combinations are being set up. Furthermore, the format of the spreadsheet is not consistent with the format of the relevant MDD table (the entity forms mirror the relevant tables in the MDD system). In recent MDD publishes there have been a number of entity 27 changes and there is a possibility that the numbers will increase as Suppliers trial Smart Metering. As a result of this, the entity 27 form should be formalised in BSCP509 to allow for a more consistent approach for participants submitting their data items.	
Proposed Solution <i>(mandatory by originator)</i> We propose a new Entity form 27 be included in the BSCP509 Appendix. A draft version of what the entity form should look like is attached with this Change Proposal (Attachment B). As part of this change we will transfer some text (footnote 17) from BSCP509 to the Entity form 27 and remove references to SSC1 and SSC2 as the SSCs are no longer used (Attachment A).	
Justification for Change <i>(mandatory by originator)</i> Including this entity form will bring about a more consistent approach toward making submissions of data items and also making it more easy and accessible for the customer to get the forms when required.	
To which section of the Code does the CP relate, and does the CP facilitate the current provisions of the Code? <i>(mandatory by originator)</i> This CP better facilitates the provisions of Section S ¹ and BSCP509. The proposed changes will ensure that the process of submitting the relevant MDD data is made more efficient and effective. CP1327 will improve on the current baseline and ensure that the market operates more effectively in the future.	

¹ ‘Supplier Volume Allocation’

Estimated Implementation Costs (mandatory by BSCCo)

The estimated ELEXON implementation cost is 2 man days, which equates to £480.

There are no associated BSC Agent costs for this change.

Configurable Items Affected by Proposed Solution(s) (mandatory by originator)

BSCP509 'Changes To Market Domain Data'
BSCP509 'Appendix: MDD Entity Change Request Forms'

Impact on Core Industry Documents or System Operator-Transmission Owner Code (mandatory by originator)

None

Related Changes and/or Projects (mandatory by BSCCo)

None

Requested Implementation Date (mandatory by originator)

November 2010

Reason:

Earliest possible release

Version History (mandatory by BSCCo)

This is version 1.0 of the CP for impact assessment. This CP has not been issued previously as a DCP.
