

Change Proposal – BSCP40/02

CP No: 1198

Version No: 1.0
(mandatory by BSCCo)

Title (mandatory by originator)

Changes to BSCP14 ‘Processing of Manifest Error Claims’ to comply with the BSC.

Description of Problem/Issue (mandatory by originator)

BSCP14 is unclear on the number of Manifest Error(s) claims that must be claimed for a Bid-Offer Pair or for a sequence of Bid-Offer Acceptances (BOAs). In addition, and as it is set out currently, BSCP14 does not adequately define the processing of a Manifest Error claim raised by a Lead Party and the processing of a Manifest Error claim raised by the Transmission Company. These could lead to the incorrect processing of Manifest Error claims.

It is felt that BSCP14 does not clearly reflect Section Q of the Code which states that a Manifest Error is “*in relation to a Bid-Offer Pair*”, if submitted by a Lead Party, and “*in relation to a Bid-Offer Acceptance*” if submitted by the Transmission Company.

There are also several typographical errors that have been found in BSCP14 that need to be corrected.

Proposed Solution (mandatory by originator)

Ensure that the changes to BSCP14 will accurately and clearly reflect the number of Manifest Error claim forms that must be raised for a sequence of Bid-Offer Pairs in the case of a Lead Party of a BM Unit, or a sequence of Bid-Offer Acceptances (as they may relate to one or more Bid-Offer Pairs), in the case of the Transmission Company.

Correct the following typographical errors in BSCP14:

- In the “Contents” table p.5, the title for section 4.13 and the page number should be aligned correctly.
- In footnote 2 on p.6, “Section Q 7.4.2” should be changed to “Section Q7.4.2” and the extra space at the start of the second sentence should be deleted.
- In section 1.5, there should be a “.” after the reference to BSCP11, and a “.” after the reference to BSCP38.
- Throughout the document there are references to “DA”, the Disputes Authority. These should be changed to “DS”, for the “Disputes Secretary”.
- Throughout section 3, there is inconsistent punctuation in the “Action” and “Information Required” fields. None of the entries in these sections should have “.”
- Throughout BSCP14, instances where it reads “BSCCo Finance Department” should be changed to read “BSCCo”.
- All instances of “NGC” should be replaced with “TC”.

Justification for Change (mandatory by originator)

As BSCP14 is very often the first point of reference for BSC Parties (including the Transmission Company), it is absolutely vital that it is clear on the number of Manifest Error claims that can be claimed for a Bid-Offer Pair or for a sequence of Bid-Offer Acceptances. The current lack of clarity in BSCP14 increases the likelihood of a misunderstanding of the processing of Manifest Error claims.

The proposed changes to BSCP14 should ensure that there will be greater clarity for BSC Parties (including the Transmission Company) over what can be claimed as a Manifest Error, and thus ensure that BSCP14 is consistent with the Code.

In addition, the proposed changes would ensure that BSCP14 has a better definition of a “Manifest Error”, in that it would be consistent with what is written in the Code, thereby preventing any misinterpretation of the range of items to be included in a Manifest Error claim, such as a Manifest Error being claimed for multiple BOAs.

To which section of the Code does the CP relate, and does the CP facilitate the current provisions of the Code? *(mandatory by originator)*

This CP relates to Section Q ‘Balancing Mechanism Activities’, and does facilitate the current provisions of the Code.

Estimated Implementation Costs *(mandatory by BSCCo)*

Configurable Items Affected by Proposed Solution(s) *(mandatory by originator)*

BSCP14 ‘Processing of Manifest Error Claims’

Impact on Core Industry Documents or System Operator-Transmission Owner Code *(mandatory by originator)*

None.

Related Changes and/or Projects *(mandatory by BSCCo)*

None.

Requested Implementation Date *(mandatory by originator)*

February 2008 Release

Reason:

Next available release.

Version History *(mandatory by BSCCo)*

Version 1.0 for industry Impact Assessment.
