Explanation of this mapping: Grey squares indicate that the paragraph included in the new PSL, is not included anywhere in the old PSL. Squares left white show the reference of the same paragraph in the old PSL. Comments have been added where this is not clear cut. So, if a similar phrase is included in the old PSL, which cannot be considered to be the same as the new requirement, then the square is shaded grey and a comment added, explaining the difference. If the phrase(s) could be considered to cover the new requirement then the square is not shaded and the relevant references are included, again the comment details the difference(s).
