

CP1283 Attachment– Redline changes to Interface Definition and Design: Part 2 - Interfaces to other service providers (Section 7.61; 7.62 and 7.63).

7.61 SAA-I034: (output) Report Recommended Data Change

Interface ID: SAA-I034	User: BSCCo	Title: Report Recommended Data Change	ITT reference: CP995, CP1283
Mechanism: Manual	Frequency: In response to SAA-I033 <u>for an Emergency Instruction</u>	Volumes: Low	
Interface Requirement: The SAA will report to <u>the</u> BSCCo <u>and</u> recommend a course of action with regards <u>to</u> a request for data change received from the System Operator (via SAA-I033) <u>where the request is marked as an Emergency Instruction</u> .			
Non Functional Requirement:			
Issues:			

7.62 SAA-I035: (input) Receive Instruction for Data Change

Interface ID: SAA-I035	Source: BSCCo	Title: Receive Instruction for Data Change	ITT reference: CP995, CP1283
Mechanism: Manual	Frequency: In response to SAA-I034	Volumes: Low	
Interface Requirement: In response to SAA-I034 <u>for an Emergency Instruction</u> , BSCCo shall send to the SAA instructions for a data change.			
Non Functional Requirement:			
Issues:			

7.63 SAA-I036: (output) Report Confirmation of Data Change

Interface ID: SAA-I036	User: BSCCo, System Operator	Title: Report Confirmation of Data Change	ITT reference: CP995, CP1283
Mechanism: Manual	Frequency: In response to SAA-I035 <u>for an Emergency Instruction</u> <u>or</u> <u>In response to SAA-I033 for a Non-Emergency Instruction.</u>	Volumes: Low	
Interface Requirement: The SAA shall report to BSCCo and the System Operator confirmation of the completion of an instructed data change (received via SAA-I035 <u>for an emergency Instruction or via SAA-I033 for non-emergency instructions</u>).			
Non Functional Requirement:			
Issues:
