

Change Proposal – F40/01

CP No: 999

Version No:

Title

Upgrade of the SVA software application to operate under UNIX 5.1B

Description of Problem/Issue

The current version of SVA, v7.0.0, operates under UNIX 5.1 which is a prior version to the latest supported version, UNIX 5.1B .

The proposed upgrade of the operational server requires that UNIX 5.1B is used and consequently the current version of SVA will not operate on the proposed hardware platform.

Proposed Solution(s)

The SVA software application will be upgraded to operate using UNIX 5.1B.

Justification for Change

The upgraded version will maintain compatibility with the latest supported UNIX release and enable a move to a new hardware platform.
