

Change Proposal – F40/01	CP No:988 Version No: 2
Title <i>(mandatory by originator)</i> Performing Data Estimations Post SF Run	
Description of Problem/Issue <i>(mandatory by originator)</i> Section R 5.3 of the Code allows the CDCA to make data estimations. The Code does not give a deadline by which estimations must be submitted. The Code does however require the CDCA to act in accordance with BSCP03. BSCP03 currently only covers data estimations up to SD +14 i.e. in time for the SF run, and is silent on what should occur after those timescales. Parties can submit data to the CDCA and if agreement is reached between them, this is used in settlement. However, the CDCA must use its own estimated data if no agreement is reached. In practice estimations do occur after SF up until RF. This poses several problems: The CDCA could receive data from a Party any time up until RF and thus would have little time to consider the data and use it in settlement. This makes the CDCA's job difficult and could lead to an increase in the number of Trading Disputes. Additionally, BSCP11 has a 40WD before RF Run cut-off period for raising a Trading Query. If the CDCA receive data from a party after this date and reject it the Party can only raise a Post Final Trading Dispute. This is not cost effective.	
Proposed Solution(s) <i>(mandatory by originator)</i> BSCP03 should be modified as follows: 3.1 should be titled as <i>Data Estimations for SF Run</i> . A new section, 3.2 should be written in, titled <i>Data Estimations Post SF Run</i> , with similar wording as 3.1. A cut-off date of [45]WD* days prior to RF should be included and direction for the registrant to raise a Trading Query through BSCP11 after this date. *45 days is suggested to allow the CDCA time to consider the data and the Party to still be able to raise a Trading Query.	
Justification for Change <i>(mandatory by originator)</i> The whole post SF data estimation process needs to be made more robust and with clear guidelines on timescales etc	
Configurable Items Potentially Affected by Proposed Solution(s) <i>(optional by Originator)</i>
