

<b>Change Proposal – BSCP40/02</b>	<p>CP No: 1234</p> <p><i>Version No: 1.0</i> <i>(mandatory by BSCCo)</i></p>
<p><b>Title</b> <i>(mandatory by originator)</i></p> <p>Movement of the functional requirements within PSL110 to BSCP514 and BSCP550 following the creation of a generic non functional PSL (PSL100) via CP1182.</p>	
<p><b>Description of Problem/Issue</b> <i>(mandatory by originator)</i></p> <p>The Code Subsidiary Document (CSD) review has highlighted that there is a large amount of duplication between the requirements contained in Party Service Lines (PSLs) and the corresponding Balancing and Settlement Code Procedures (BSCPs).</p> <p>During a consultation as part of the CSD review, industry participants were asked whether the functional requirements of PSLs should be merged into the appropriate BSCP and a single PSL created containing non functional requirements relevant to all Party Agents. The majority of respondents to the consultation agreed with this recommendation.</p> <p>The Panel were asked to agree the recommendations of the CSD review and the CSD Architecture Principles Document at their meeting on 8 June 2006 (Panel 115/08). The Panel agreed that a single PSL should be created containing the non-functional requirements and the functional requirements in the existing PSLs should be merged into the relevant BSCPs.</p> <p>A single generic PSL, PSL100 ‘Generic Non Functional Requirements For Licensed Distribution System Operators and Party Agents’ has being created (under CP1182) containing participants non-functional requirements.</p> <p>Following on from CP1182, the functional requirements from the SVA Meter Operations PSL (PSL110) should be moved into BSCP514 ‘SVA Meter Operations for Metering Systems Registered in SMRS’ and BSCP550 ‘Shared SVA Meter Arrangement of Half Hourly Import and Export Active Energy’.</p>	
<p><b>Proposed Solution</b> <i>(mandatory by originator)</i></p> <p>Changes should be made to BSCP514 and BSCP550 to include all of the functional requirements currently included in PSL110. Redlining to suggest where requirements currently in PSL110 should sit within BSCP514 and BSCP550 are attached to this CP (Attachment A and B respectively). Guidance as to where requirements have been moved to (a mapping matrix) and where they have come from (a reverse mapping matrix) have also been provided as attachments (Attachments C, D and E).</p> <p>It is noted that this change will require additional more minor changes to other CSDs to correct references to PSL110. BSCP537 ‘Appendix 1 Self Assessment Document (SAD)’, BSCP504 ‘Non-Half Hourly Data Collection for SVA Metering Systems Registered in SMRS’, ‘SVA Data Catalogue Volume 1’ and ‘SVA Data Catalogue Vol 2’ will be affected and the redlining for these documents is included as Attachments F, G, H and I to this CP.</p> <p>A housekeeping modification will be needed to update/remove references to PSL110 within the BSC before PSL110 is entirely removed. For efficiency, it is anticipated that a single housekeeping modification will be used to update all of the PSL references when all of the functional requirements in the PSLs have been moved into BSCPs.</p>	

**Justification for Change** *(mandatory by originator)*

This change will move the functional requirements in PSL110 into BSCP514 and BSCP550 and will mean that SVA Meter Operators will only have to look in the relevant BSCPs to find the functional requirements relating to their role. This may be particularly useful to new entrants. It will also reduce the cost associated with preparing and maintaining numerous and duplicated PSLs.

**To which section of the Code does the CP relate, and does the CP facilitate the current provisions of the Code?** *(mandatory by originator)*

N/A

**Estimated Implementation Costs** *(mandatory by BSCCo)*

The Estimated implementation cost is 2.5 ELEXON man days, which equates to £550.

**Configurable Items Affected by Proposed Solution(s)** *(mandatory by originator)*

BSCP514 'SVA Meter Operations for Metering Systems Registered in SMRS';  
BSCP550 'Shared SVA Meter Arrangement of Half Hourly Import and Export Active Energy';  
BSCP537 'Appendix 1 Self Assessment Document (SAD)';  
BSCP504 'Non-Half Hourly Data Collection for SVA Metering Systems Registered in SMRS';  
'SVA Data Catalogue Volume 1'; and  
'SVA Data Catalogue Volume 2'.

**Impact on Core Industry Documents or System Operator-Transmission Owner Code** *(mandatory by originator)*

None identified.

**Related Changes and/or Projects** *(mandatory by BSCCo)*

CP1230 - Movement of the functional requirements within PSL120 to BSCP504, following the creation of a generic non functional PSL (PSL100) via CP1182

DCP0026 - Movement of the functional requirements within PSL 110 'SVA Meter Operation' to BSCP514 'SVA Meter Operations for Metering Systems Registered in SMRS' and BSCP550 'Shared SVA Meter Arrangement of Half Hourly Import and Export Active Energy', following the creation of a generic non functional PSL (PSL100) via CP1182

DCP0025 - Transfer of the Non Half Hourly Data Aggregator functional requirements from PSL140 to BSCP505 following the creation of PSL100 'Generic Non Functional Requirements For Licensed Distribution System Operators And Party Agents'

**Requested Implementation Date** *(mandatory by originator)*

November 2008

**Reason:** This is the next available release.

**Version History** (*mandatory by BSCCo*)

N/A

**Originator's Details:**

**BCA Name**.....*Mike Smith*.....

**Organisation**.....*ELEXON Ltd*.....
