

<b>Change Proposal – F40/01</b>	<b>CP No: 1125</b> <i>Version No: 2.0</i>
<b>Title:</b> Submission of the D0028 'Standing Profile Data Report' over the Data Transfer Network	
<p><b>Description of Problem/Issue</b> <i>(mandatory by originator)</i></p> <p>ELEXON Circular EL01284 provided details of an issue at the Supplier Volume Allocation Agent (SVAA) whereby D0028 Standing Profile Data Reports were unable to be issued via the Data Transfer Network (DTN) to Suppliers and Non-Half Hourly Data Collectors (NHHDCs) for all post BETTA Go Live Settlement Days. The D0028 is generated in the Daily Profile Production (DPP) process and provides details of the standing data used in a particular DPP run. It allows Suppliers and Non-Half Hourly Data Collectors (NHHDCs) to recreate the output of the run if necessary and is therefore particularly useful should there be any doubt over the output of a particular DPP run and as a check to ensure exactly what data was used in the run.</p> <p>The issue itself arose as a consequence of an increase in field length of one of the data items in the D0028. The "Report Parameters (GSP Groups)" data item (Data Transfer Catalogue reference J1191) details exactly which GSP Groups have been included in a particular DPP Run. Prior to BETTA Go-Live, this field contained the IDs of the twelve England and Wales GSP Groups, and was a length of 36 characters. Following BETTA Go-Live, the inclusion of the two Scottish GSP Group IDs has increased the length of this field to 42 characters. The Data Transfer Catalogue states that this data item can be a maximum of 39 characters. As such, the post BETTA Go-live D0028s have been correctly rejected by the DTN. The files for all DPP runs have, however, been created and are still available upon request from the SVA Agent Helpdesk and will be emailed to any Supplier or NHHDC requesting them.</p>	
<p><b>Proposed Solution(s)</b> <i>(mandatory by originator)</i></p> <p>Three options were proposed and consulted on to address the issue (see CP1125 version 1.0). A further option has now been proposed that is thought to comprise the most appropriate aspects of the former three options:</p> <p>The DTC and the DTN would both be amended at the same time in the November 2005 release, to ensure that the field length of the "Report Parameters (GSP Groups)" data item would allow 42 characters allowing transmission of the files across the DTN.</p> <p>In addition the production of the D0028 flow would be suppressed and the requirement from BSCP508 for the SVA Agent to send the flow would be removed (References to the D0028 would also be removed from BSCP504).</p> <p>In the interim and on an ongoing basis Suppliers and NHHDCs would have to request the file if/when required from the SVA Agent Helpdesk.</p> <p>References to the D0028 would remain in the DTC, the SVA Agent software and the SVA Data Catalogue, so that if Parties wished to receive the D0028 in the future they could raise a Change Proposal to reinstate the flow over the DTN.</p>	

<b>Change Proposal – F40/01</b>	<b>CP No: 1125</b> <i>Version No: 2.0</i>
<p><b>Justification for Change</b> <i>(mandatory by originator)</i></p> <p>Referring to BSCP504, BSCP508, the SVA Data Catalogue and the Data Transfer Catalogue, NHHDCs and Suppliers can expect to receive the D0028 electronically over the DTN, however following BETTA Go-Live this is not possible. The DTC and DTN should be amended to make this possible.</p> <p>Since the D0028 has not been available over the DTN, the SVAA Helpdesk has been able to supply the flow on request (as documented in ELEXON Circular E001284). However, to date, no Suppliers or NHHDCs have requested D0028 files from the SVAA Helpdesk, suggesting that this file may no longer be of use to participants. This is the rationale for suppressing the file.</p> <p>The possibility of requesting it from the SVAA if required is still available. How to do this is documented in ELEXON Circular E001284 and is publicised by this CP and the related discussions at various fora i.e. Supplier Volume Allocation Group (SVG), Software Technical Advisory Group (STAG), Supplier Agent Forum (SAF), SVA Forum.</p>	
<p><b>Configurable Items Potentially Affected by Proposed Solution(s)</b> <i>(optional by Originator)</i></p> <p>SVA Data Catalogue, BSCP504 and BSCP508</p>	
<p><b>Impact on Core Industry Documents</b> <i>(optional by originator)</i></p> <p>Data Transfer Catalogue</p>	
<p><b>Related Changes and/or Projects</b> <i>(mandatory by BSCCo)</i></p> <p>An MRA DTC CP will be raised.</p>	
<p><b>Requested Implementation Date</b> <i>(mandatory by originator)</i></p> <p>November 2005</p> <p><b>Reason:</b></p>	
<p><b>Agreed Release/Implementation Date</b> <i>(mandatory by BSCCo)</i></p>	
<p><b>Originator's Details:</b></p> <p><i>BCA Name</i>.....</p> <p><i>Organisation</i>.....<i>ELEXON Ltd</i>.....</p> <p><i>Email Address</i>...<i>CCC@elxon.co.uk</i>.....</p> <p><i>Date</i>.....<i>08/04/2005</i>.....</p>
