

<b>Change Proposal – F40/01 (Page 1 of 2)</b>	<b>CP No: 876</b> <i>(mandatory by BSCCo)</i>
<b>Title</b> <i>(mandatory by originator)</i> Resolution of internal BMRA discrepancies – forecast National Demand Surplus	
<b>Description of Change</b> <i>(mandatory by originator)</i>  This CP proposes to resolve internal documentation and IDD discrepancies within the BMRA by updating all incorrect references to forecast National Demand Surplus (“Surplus”), to be consistent with the BSC Annex X-2.  Currently the correct values are used <b>in all cases</b> but some documentation uses the incorrect acronym names. (a) the flow from the System Operator to the BMRA uses the incorrect acronyms OCNMFD2 and OCNMFW2 (but the correct values) (b) the BMRA screens use the correct acronyms – SPLW and SPLD (and the correct values) (c) the BMRA Tibco messages use the incorrect acronyms OCNMFD and OCNMFW (but the correct values)  The BMRA software, IDD Parts 1 and 2 and NGC BMRA SAA Interface Specification incorrectly use the acronyms OCNMFD and OCNMFD2 [Generating Plan Demand Margin (daily value)] and OCNMFW and OCNMFW2 [Generating Plan Demand Margin (weekly value)] to describe daily and weekly Surplus.  This CP proposes the BMRA, the IDD parts 1 and 2 and the BMRA SAA Interface Specification are updated to use the correct acronyms SPLD [Surplus (daily value)] and SPLW [Surplus (weekly value)].	
<b>Proposed Solution(s)</b> <i>(mandatory by originator)</i>  The BMRA software, NGC BMRA & SAA Interface Specification and IDD Parts 1 and 2 will be revised to use the acronyms SPLD and SPLW for Surplus (daily and weekly values), consistent with the BSC.  This change will impact the content of the interface from the System Operator to BMRA so that Surplus is defined using SPLD and SPLW instead of OCNMFD2 and OCNMFW2.  In the IDD Part 1 the Tibco message subject names “OCNMFD” and “OCNMFW” would be revised to be “SPLD” and “SPLW”.	

**Justification for Change** *(mandatory by originator)*

Annex X-2 Table 3 of the Balancing and Settlement Code defines the following acronyms (effective 30/09/02):

- OCNMFW, OCNMFD – Generating Plant Demand Margin (weekly/daily)
- SPLW, SPLD - Surplus (daily/weekly).

*The NGC BMRA SAA Interface Specification and IDD Part 1 (BMRA-1005) use OCNMFW and OCNMFD to describe Surplus, not to describe Generating Plant Demand Margin (which is displayed on the BSC website). This is inconsistent with the BSC.*

Note. The BMRA website correctly displays Surplus data, using the acronyms SPLD and SPLW for daily and weekly Surplus data.

**Change Proposal – F40/01 (Page 2 of 2)****CP No: 876***(mandatory by BSCCo)***Other Configurable Items Potentially Affected by Proposed Solution(s)** *(optional by BSCCo)*

*BMRA URS  
IDD Parts 1 and 2  
Neta Data File Catalogue  
BMRA software  
NGC BMRA & SAA Interface Specification*

**Impact on Core Industry Documents** *(optional by originator)*

*None*

**Related Changes and/or Projects** *(mandatory by BSCCo)*

*This CP assumes Modifications P33, P86 already implemented.*
