

Change Proposal – F40/02 (Page 1 of 2)	CP No: 871 <i>(mandatory by BSCCo)</i>
Title <i>(mandatory by originator)</i> Operational Review of BSCP40 (Change Management)	
<p>Description of Change <i>(mandatory by originator)</i></p> <p>BSCP40 was written before NETA Go Live and was therefore based on how it was thought the change process would work.</p> <p>In light of operational experience, it is now thought an appropriate time to carry out a wholesale review of the change management procedures to identify, where appropriate, more efficient and effective ways of working. The review will also look to bring some areas in line with working practice.</p> <p>This review has also been requested by the Imbalance Settlement Group (ISG)</p>	
<p>Proposed Solution(s) <i>(mandatory by originator)</i></p> <p>Carry out an operational review of the whole change management process, detailed in BSCP 40 (Change Management). The end result will be a re-written and re-issued BSCP40.</p> <p>This will be done using an industry ‘expert group’ to ensure all areas of the market have the opportunity to provide the benefit of their experience (good and bad of working with the current process..</p>	
<p>Justification for Change <i>(mandatory by originator)</i></p> <p>The current version of BSCP40 has now been in use for 18 months, since NETA Go Live. This document was produced based on the Modification process contained in Section F of the BSC.</p> <p>With operational experience it has been recognised that there are a number of aspects of the process that could be clarified, removed and improved, to help all participants better understand and make better use of the change management process.</p>
