<p><b>Title</b> <i>(mandatory by originator)</i> <b>Assignment of CALF values to new BMU Units</b></p>	
<p><b>Description of Change</b> <i>(mandatory by originator)</i></p> <p>This Change Proposal has been raised to address the problem that BM Units are being registered without Credit Assessment Load Factor (CALF) values in certain circumstances. This issue arose primarily as a result of instances where new Suppliers register with the CRA, who then automatically generate 12 Base BM Unit. The registration of these BM Units is being completed before the CALF values are provided by ELEXON.</p> <p>If a Party wishes to be registered as a Supplier they submit their registration details to both the Central Registration Agent (CRA) and BSCCo (BSCP65, step 3.1.3, CRA-I001). Provided they have passed Qualification, they will be registered as a Supplier within the CRA database and 12 Base BM Units will be automatically generated. The CRA should inform ELEXON that the BM Units have been created and ELEXON should provide the CALF values. This does not always happen.</p> <p>Similarly, when a Party is already registered and applies for a new BM Unit through BSCP15, step 3.3.5 of BSCP15 states that the CRA should inform ELEXON that the BM Unit has been created. ELEXON should then provide the CALF values via the CRA-I011 flows.</p> <p>However, the CRA User Requirement Specification (URS) does not refer to these interfaces between the CRA and BSCCo (ELEXON) and, as a result, BM Units are being registered without CALF values.</p>	
<p><b>Proposed Solution(s)</b> <i>(mandatory by originator)</i></p> <p>ELEXON need to be informed, by the CRA, when a Party requests registration of a new BM Unit (BSCP15, steps 3.1.6 and 3.4.4) or when a Party registers as a Supplier through BSCP65 and 12 Base Units are automatically generated. There should be an obligation on the CRA to obtain the relevant CALF values from ELEXON before completing the registration.</p> <p>The functional requirements in the CRA URS need to be modified, such that on registration of new BM Units:</p> <ul style="list-style-type: none"> <li>a) the CRA sends a copy of the registration form to ELEXON within 1 WD (as specified in BSCP15); and</li> <li>b) ELEXON responds with the CALF values required using the current interface CRA-I011 (within 2 WD).</li> </ul> <p>The CRA URS, BSCP15 and BSCP65 should therefore be modified to detail the step whereby ELEXON informs the CRA of the CALF value. This should state that the registration is not completed until the CALF value has been assigned.</p>	
<p><b>Justification for Change</b> <i>(mandatory by originator)</i> To ensure that CALF values are assigned to new BM Units.</p>	
<p><b>Other Configurable Items Potentially Affected by Proposed Solution(s)</b> <i>(optional by BSCCo)</i> CRA Service description</p>	
<p><b>Impact on Core Industry Documents</b> <i>(optional by originator)</i></p>	
<p><b>Related Changes and/or Projects</b> <i>(mandatory by BSCCo)</i></p>
