

## Change Proposal – F40/01 (Page 1 of 2)

S21773  
CP No: 556  
(mandatory by BSCCo)

**Title** (mandatory by originator) Participation Capacity Clarification in BSCP65 version 2

### **Description of Change** (mandatory by originator)

There is inconsistent use of terminology relating to Participation Capacity between BSCP65 4.1, the Code A1.3.1 and CRA URS CRA F001 – all documentation should be aligned.

*Proposed amendments are detailed in Attachment 1.*

***This Change Proposal has been raised from NCR323 version 2.***

### **Proposed Solution(s)** (mandatory by originator)

#### **BSCP65 Version 2**

- i) Form BSCP65/4.1, Party Registration Application / Change of Registration Details Form, to be updated to reflect the Participation Capacity terminology used in the Code, Section A paragraph 1.3.1.
- ii) Update the Route Map to show that DSO, TC and IA register as Parties with the CRA after Accession and that the IEA is classified as another Trading Party i.e. one not required to register BM Units and meters but a Party who is allocated Energy Accounts.

#### **CRA URS Version 2.4**

Where the CRA URS refers to Participation Capacities the URS needs to be updated to reflect the terminology used in the Code, Section A paragraph 1.3.1.

### **Justification for Change** (mandatory by originator)

Ensure that Parties register in the correct Participation Capacity under BSCP65, as required in the Code. If Parties were to register in Participation Capacities not recognised by the Code it may lead to confusion for Parties and Service Providers and ultimately may prohibit Parties from undertaking certain activities eg under the current Participation Capacities covered in BSCP65 Supplier is not seen as a Participation Capacity.
