

Change Proposal – F40/01 (Page 1 of 2)

CP No: 705
(mandatory by BSCCo)

Title (mandatory by originator) Provision of SVA Meter Advance Register data by Suppliers

Description of Change (mandatory by originator)

When situations occur where the Half Hourly Data Collector (HHDC) is unable to collect Half Hourly consumption/export data from SVA Metering Systems, but other sources are able to provide Meter Advance Register information, BSCP502 requires a mechanism to allow this data to be used to improve the accuracy of settlements.

Proposed Solution(s) (mandatory by originator)

Amend BSCP502 to allow the provision of Meter Advance Register data to the HHDC by Suppliers, for validation and entry into Settlements.

Justification for Change (mandatory by originator)

There are situations where the HHDC has not been able to obtain actual HH data but Suppliers hold Meter Register data. Presently, the HHDC will estimate consumption even though the Supplier could provide actual meter advances for these settlement periods.

If Suppliers were allowed to provide this information to the HHDC, when the HHDC was unable to obtain it, many periods that are presently estimated using less accurate methods, could be furnished with estimated data that more accurately reflects the total MPAN demand.

It would be a requirement on the HHDC to validate the Meter Advance data provided by the Suppliers to ensure the reasonableness of this data (by comparison with subsequently polled actual demand).
