

Stage 03: Transmission Company Analysis

P286 'Revised treatment of RCRC for generation BM Units'

Response Form

The P286 Workgroup requests your impact assessment of P286. In particular, we ask for your responses to the following questions and your reasons for those responses.

Transmission Company Questions

Question 1:

Please describe the impact(s) of P286 on your ability as a Transmission Company to discharge your obligations efficiently under the Transmission Licence and to operate an efficient, economical and co-ordinated Transmission System.

Please give your response:

P286 will allow NGET to better demonstrate compliance with its Transmission Licence.

Question 2:

Please outline your views and rationale on whether P286 would help to achieve the Applicable BSC Objectives.

Please give your response:

If CMP201 is implemented then P286 removes the potential for wider EU market distortion arising from payments / charges on GB generation for which there is no common EU equivalent. Failure to remove RCRC if CMP201 is approved may also dilute the cash-out signal for generators to self balance with the potential to increase system balancing costs. As such it will better facilitate Applicable BSC objectives (a) and (c).

Question 3:

Please outline the impact of P286 on the computer systems and processes of the Transmission Company. Include details of any changes needed as a result of implementing P286.

Please give your response:

P286 will not have any impact on the computer systems or processes of the Transmission Company.

What stage is this document in the process?

01 Initial Written Assessment

02 Definition Procedure

03 Assessment Procedure

04 Report Phase

Your response

We invite you to respond to the questions in this form.

How to return your response

Please send responses, entitled 'P286 Transmission Company Analysis' to modifications@elexon.co.uk by 5pm on Friday 14 September 2012

Question 4:

Please outline any potential issues relating to security of supply arising from P286.

Please give your response:

There are no security of supply issues arising from P276.

Question 5:

Please provide an estimate of development, capital and operating costs in appropriate detail which you as a Transmission Company anticipate that you would incur in implementing P286.

Please give your response:

P286 will not have any Transmission Company development costs.

Question 6:

Please provide details of any consequential changes to Core Industry Documents and/or the System Operator Transmission Owner Code that would be needed as a result of implementing P286.

Please give your response:

There would be no consequential changes to Core Industry Documents as a result of P286.

Question 7:

Would you like to make any other comments on P286?

Please give your response:

No further comments.

Further Information

To help us process your response, please:

- Email your completed response form to modifications@elexon.co.uk
- Use the following text in the subject line of your email: "P286 Transmission Company Analysis"
- Include a phone number in your covering email, so that we can contact you if we have any questions
- Respond by **5pm on Friday 14 September 2012** (the Workgroup may not be able to consider late responses)

The Workgroup will consider your response at its next meeting. Once the Workgroup has completed its assessment of P286, it will draft the Assessment Report and present it to the October 2012 Panel meeting.
