

Approval of CP1383

Meeting Name	Panel
Meeting Date	13 December 2012
Purpose of paper	For Decision
Summary	The SVG recommend the Panel approve CP1383 'Upgrade of NHHDA and EAC/AA systems to Oracle 11g', a decision they cannot make as the implementation cost is above the £150K SVG approval threshold.

1. Background

- 1.1 ELEXON has always provided Party Agents with Non Half Hourly Data Aggregation (NHHDA) and Estimation of Annual Consumption/Annualised Advance (EAC/AA) software on which to run the NHHDA and EAC/AA applications. The previous upgrade to the software was carried out six years ago in November 2006 when CP1117 'Upgrade of NHHDA and EAC/AA systems to Oracle 10g' was implemented.
- 1.2 Support for Oracle 10g versions of NHHDA and EAC/AA applications ended in July 2012 meaning systems are now running on unsupported platforms. CP1383 proposes to upgrade NHHDA and EAC/AA systems to the latest available version of Oracle, which is version 11g.

2. Why Panel approval?

- 2.1 The Panel has delegated authority to the SVG to approve CPs where the total central implementation cost is less than £150,000. As the estimated total central implementation cost for CP1383 is £225,800 the SVG's Terms of Reference require the SVG to make a recommendation to the Panel for approval of the CP.

3. SVG Recommendation

- 3.1 The CP1383 report was presented to the SVG at its meeting on 04 December 2012 and provided details of the background, solution, impacts and industry views for CP1383. This SVG Paper (142/03) can be found in Attachment A and the full collated participant responses to CP1383 can be found in Attachment B. Both of these documents can also be found on the BSC website [here](#).
- 3.2 The SVG endorsed CP1383 and recommended to the Panel that it be approved for implementation as part of the June 13 release.

4. Recommendations

4.1 ELEXON invites the Panel to:

- a) **NOTE** SVG's recommendation to approve CP1383 and;
- b) **APPROVE** CP1383 for implementation on 27 June 2013, as part of the June 2013 Release.
