When instructed to do so by BSCCo or the Performance Assurance Board (PAB),  
The NHHDA shall ~~periodically~~ request and load a Full Refresh from a SMRS comprising the complete registration and standing data for all SVA Metering Systems for which the NHHDA is responsible in that SMRS whenever required to ensure the integrity of the NHHDA's database.

Where required to resolve a failed instruction, query or exception reported during an aggregation run the NHHDA shall request a Selective Refresh for the relevant SVA Metering Systems from the relevant SMRS.

**[Housekeeping]4.8**      **Non Half Hourly Data Aggregator Service Levels**~~Not Used~~

This Appendix details the required service levels:

- ~~(i) — the function to be performed by the NHHDA, as described in columns 2 to 5 of the table set out in this Appendix, in respect of which minimum standards of performance are required;~~
- ~~(ii) — the minimum standards of performance (Service Levels) relating to the functions referred to in paragraph (i) above, as described in columns 6 and 7 of the table set out in this Appendix;~~
- ~~(iii) — a reference number (serial) in respect of each Service Level, as described in column 1 of the table set out in this Appendix; and~~
- ~~(iv) — the method by which the NHHDA's adherence to the Service Levels is to be measured, as defined in column 8 of the table set out in this Appendix.~~

For the purpose of this Appendix:

- ~~(a) — the references in column 3 of the table are to the relevant paragraph in Section 3.3 of BSCP505;~~
- ~~(b) — the references in column 4 of the table to a sub-process / data flow are to the relevant sub-processes or data flow as described in the relevant BSC Procedure;~~
- ~~(c) — references to “Timescales” are to those specified by the relevant BSC Procedure and if applicable the SVAA Calendar;~~
- ~~(d) — references to a certain percentage of tasks being completed within a certain specified period are to be read as a reference to that percentage of tasks being completed during the applicable reporting period as specified by the relevant BSC Procedure;~~
- ~~(e) — references to an item being “valid” are to an item which conforms to an applicable BSC SVA Data Catalogue item;~~
- ~~(f) — reference to an item being “in correct format” are to an item which complies with the applicable BSC SVA Data Catalogue format or the format specified by the relevant BSC Procedure;~~
- ~~(g) — references to an item being “accurate” are to an item being correctly recorded; and~~
- ~~(h) — in calculating percentages, the performance figures shall be rounded up or down to the nearest one decimal place (with 0.05 being rounded upwards).~~

It should be noted that the following table includes one serial which is reported on by another Agent. Where another Agent is responsible for reporting on an Agent's performance, that Agent is named in the Reporting Method column.
