Balancing and Settlement Code

BSC PROCEDURE

BM Unit Registration

BSCP15

Version 26.0

Date: 22 February 2018

BSC PROCEDURE 15

relating to

BM UNIT REGISTRATION

- 1. Reference is made to the Balancing and Settlement Code and, in particular, to the definition of "BSC Procedure" in Section X, Annex X-1 thereof.
- 2. This is BSC Procedure 15, Version 26.0 relating to BM Unit Registration.
- 3. This BSC Procedure is effective from 22 February 2018.
- 4. This BSC Procedure has been approved by the Panel.

1. Introduction

1.1 Purpose and Scope of the Procedure

This BSCP defines the key interfaces, interdependencies and timetable for the registration and de-registration of BM Units by the Party, which, for the avoidance of doubt, includes:

- New registration;
- De-registration;
- Changes in the FPN flag status;
- Registration of Seasonal Estimates of the Maximum Positive Magnitude and Maximum Negative Magnitude BM Unit Metered Volume;
- Application for Exemptable status for a Generating Plant and Exempt Export status for the associated BM Unit(s), including election of the Production / Consumption Status for the Exempt Export BM Unit(s) by the Lead Party;
- Change of Production / Consumption Status for an Exempt Export BM Unit by the Lead Party;
- Termination of Exemptable status for a Generating Plant and the Exempt Export status of the associated BM Unit(s);
- Mid-Season Changes of the Maximum Positive Magnitude and Maximum Negative Magnitude BM Unit Metered Volume;
- Change of CVA BM Unit Lead Party;
- Transfer of Supplier ID; and
- Notification of Switching Group¹.

1.2 Main Users of the Procedure and their Responsibilities

The main users of this procedure are:

- (a) The Party that is de-registering the relevant BM Unit;
- (b) The Party that is registering the relevant BM Unit;
- (c) The Lead Party for an Exempt Export BM Unit (or a BM Unit which is the subject of an Exempt Export status application);
- (d) The Central Data Collection Agent (CDCA);
- (e) The Central Registration Agent (CRA);

¹ Per section K3.1.4B, Power Park Modules may belong to a Switching Group on the basis that Plant and Apparatus can be selected to run in any of the BM Units belonging to that Switching Group. A 'Switching Group' is described in Section K3.1.4A of BSC.

[P369](f) The Transmission Company (TC)National Electricity Transmission System Operator (NETSO);

- (g) Supplier Volume Allocation Agent (SVAA);
- (h) Licensed Distribution System Operators (LDSOs);
- (i) BSCCo; and
- (j) The Panel.

1.3 Key Milestones

The key milestones in this procedure are:

- Detailed notification of 'registration' of a BM Unit (except a Non-Standard BM Unit or Additional BM Unit) at least 30 Working Days prior to the Effective From Date;
 - 60 Working Days notification of registration of a Non-Standard BM Unit. A
 longer timescale is required in order that the application may be properly
 considered by BSCCo, the TCNETSO and the Panel. The Party should
 advise BSCCo of any such applications at the earliest opportunity such that
 indicative registration timescales and Effective From Dates may be
 discussed.
- 15¹⁹²⁰ Working Days notification of registration of Additional BM Unit, unless FPN flag is set to 'yes' where 30 WD notification may be needed (see section 1.6).
- 20 Working Days notification of de-registering BM Unit (30 Working Days for a Base BM Unit) prior to proposed Effective To Date;
- New Suppliers notified to SVA at least 30 Working Days prior to the Effective From Date;
- 5 Working Days notification of transfer of Directly Connected Demand BM Units, if the criteria set out in section 3.13 are satisfied;
- 5 Working Days notification of Change of CVA BM Unit Lead Party, if the criteria set out in section 3.13 are satisfied; and
- 1 Working Day notification of transfer of Supplier ID process (Change of SVA BM Unit Ownership).

The notice period required to register and de-register a BM Unit, excluding Base BM Units, may be reduced if there is an agreement between the CRA/BSCCo/Party/TCNETSO.

1.4 Balancing and Settlement Code Provision

This BSCP should be read in conjunction with the Code and in particular Section K. This BSCP has been produced in accordance with the provisions of the Code. In the event of an inconsistency between the provisions of this BSCP and the Code, the provisions of the Code shall prevail.

1.5 Associated BSC Procedures

This procedure interfaces with the following BSCPs:

BSCP02	Proving Test Requirements for Central Volume Allocation Metering Systems
BSCP06	CVA Meter Operations for Metering Systems Registered in CMRS
BSCP20	Registration of Metering System for Central Volume Allocation
BSCP25	Registration of Transmission System Boundary Points, Grid Supply Points, GSP Groups & Distribution Systems Connection Points
BSCP31	Registration of Trading Units
BSCP32	Metering Dispensations
BSCP38	Authorisations
BSCP65	Registration of Parties and Exit Procedures
BSCP68	Transfer of Registration of Metering Systems between CMRS and SMRS
BSCP71	Submission of ECVNs and MVRNs
BSCP75	Registration of Meter Aggregation Rules for Volume Allocation Units
BSCP509	Changes to Market Domain Data
BSCP128	Production, Submission, Audit and Approval of Line Loss Factors

[P369] 1.6 Transmission Company NETSO Registration Requirements

FPN flag set to Yes

Where the Party is registering a BM Unit which has the FPN flag set to Yes, the Party should consult with the TCNETSO to ensure compliance with the Grid Code and the Connection and Use of System Code regarding timescales. Failure to comply with the Grid Code and the Connection and Use of System Code may delay the registration of the BM Unit and hence the Party would not be able to trade using that BM Unit. The delay may be as a result of procurement, installation and testing of operational metering and EDT and EDL facilities, as appropriate. This BSCP refers to the last stage of the registration process of the BM Unit.

Offshore Power Park Modules

Where the Party has 2 or more Offshore Power Park Modules for whose Exports the Metering System(s) is or are registered in CMRS, the Party may either:

- Apply to register each Power Park Module as a separate BM Unit; or
- Apply to register a single BM Unit for some or all of the Offshore Power Park Modules (a 'Combined Offshore BM Unit').

A Party may only register a Combined Offshore BM Unit if the TCNETSO determines that the requested configuration of Offshore Power Park Modules is suitable to constitute a single BM Unit. Where the Party requests a Combined Offshore BM Unit in its Registration of BM Unit form BSCP15/4.1, BSCCo will confirm with the TCNETSO whether it approves the configuration. BSCCo recommends that the Party consults with the TCNETSO before submitting this form, to avoid any delay in the registration process.

[P369]1.7 BSC Website list of Suppliers which have satisfied the criteria to complete a change of BM Unit Lead Party within 5WDs for a BM Unit with CVA metering and associated with a Customer premises

BSCCo will publish and maintain a list on the BSC Website of the Party Name and ID of those Suppliers who satisfy the criteria referred to in section 3.14 of this procedure, and who have submitted a completed form BSCP15/4.10 Part A² to BSCCo in accordance with 3.15.1.

Note that BSCP15/4.11 Parts A and B must be received by BSCCo prior to a Change of BM Unit Lead Party becoming Effective. The BM Unit Effective From Date requested on the (re) registration form must be the calendar date after the Effective To Date requested on the de-registration form.

Where a BM Unit has the FPN flag set to "Yes" Parties must comply with the Transmission CompanyNETSO Registration Requirements, especially paragraph 1.6 above, and the BM Unit's Effective From Date will be the same as the Transmission CompanyNETSO Commission Date (TCCD).

² Must be authorised by a Category A authorised signatory

Any change of BM Unit Lead Party must be approved by BSCCo before the requirements of this and any related procedure are initiated.

1.8 Obligations

Parties must have successfully completed Qualification under Section O of the BSC before the Effective From Date of a BM Unit registration in order for that BM Unit registration to become effective. However, Parties may begin the process of registering BM Units in accordance with this BSCP before they have completed Qualification under Section O of the BSC (relating to communications requirements), provided that they have begun the process of obtaining such Qualification.

1.9 BM Units for CFD or CM Assets

The BSC requires that any BM Units with CFD/CM Assets shall comprise only those Assets allowed by the CFD or Capacity Agreement.

BM Units for CFD or CM Assets Registered in CMRS

Lead Parties will be able to register BM Units for Metering Systems registered in CMRS under the existing processes and approach. This is because in CMRS the BM Unit is specific to the Generating Unit and it is therefore possible to change BM Unit ownership (retaining the same identifier). The BM Unit can therefore exist for the lifetime of the Generating Unit, and consequently the lifetime of the CFD, and one or more Capacity Agreements. This means that new registration arrangements or processes are not necessary.

BM Units for CFD or CM Assets Registered in SMRS

Additional BM Units are not a permitted CM metering option. Metered volumes associated with CM Assets registered in SMRS cannot be provided to a CM Settlement Services Provider using Additional BM Units. CM Assets may still be allocated to Additional BM Units, registered under process 3.4.

Additional BM Units for CFD Assets registered in SMRS may be provided to a CFD Settlement Services Provider (CFDSSP) to be used for CFD settlement purposes. The registration of Additional BM Units for CFD Assets shall follow process 3.18. Additional BM Units for non-CFD Assets registered in SMRS should follow 3.4.

Additional BM Units for CFD Assets Registered in SMRS

Both Lead Parties and BSCCo may initiate the registration process for Additional BM Units for CFD Assets registered in SMRS using process 3.18. Additional BM Units for CFD Assets are not liable for the Section D charge for Additional BM Units. Consequently all Additional BM Unit registrations for CFD Assets must be confirmed with or instructed by the CFDSSP, and shall follow a naming convention.

The CFDSSP instructs Additional BM Unit registration details to BSCCo based on information that generators with a CFD are obliged to notify to the CFDSSP, such as when the Additional BM Units are needed. This reduces the need for Lead Parties to

manage the Additional BM Unit registration process. Lead Parties should find Additional BM Units are registered and available for use when needed.

Where it is not known which Supplier will take responsibility for Metering Systems associated with a generator with a CFD, BSCCo will register Additional BM Units for a set of Suppliers. The set will be based on a list maintained by BSCCo. The list is maintained in accordance with section 3.20. Each set of Additional BM Units will be associated with the relevant CFD for the lifetime of the CFD. Only one of the Additional BM Units in the set shall be 'active' on any particular Settlement Day.

In SMRS the BM Unit represents the Supplier's Metering System(s), so the Generating Unit(s) must be assigned to an Additional BM Unit so that the BM Unit Metered Data relates to the relevant CFD and can therefore be used by the CFDSSP for CFD Settlement purposes.

CFD Generating Unit(s) must move between Additional BM Units as responsibility under the BSC for the Metering System(s) changes i.e. as a CFD generator changes Suppliers/Offtakers its Metering Systems must move from its old Supplier's Additional BM Unit to its new Supplier Additional BM Unit. Supplier BM Unit ownership can only take place when a Supplier transfers its Supplier ID i.e. ownership of the Supplier ID (and license) is transferred. Additional BM Units registered for CFD Assets will therefore only last for the lifetime of the CFD. When the CFD expires the CFDSSP will instruct BSCCo to deregister the relevant Additional BM Units to coincide with the expiry of the CFD. The CFDSSP will know when a CFD expires.

2. Acronyms and Definitions

[P369]2.1 List of Acronyms

The following is a list of acronyms used in BSCP15:

Acronym	Expression
BMRA	Balancing Mechanism Reporting Agent
BSCCo	Balancing and Settlement Code Company
CDCA	Central Data Collection Agent
CFDSSP	Contract for Difference Settlement Services Provider
CRA	Central Registration Agent
CoBLP	Change of BM Unit Lead Party
DNC	Declared Net Capacity
EDL	Electronic Dispatch Logging
EDT	Electronic Data Transfer
EFD	Effective From Date
ETD	Effective To Date
FPN	Final Physical Notification
GSP	Grid Supply Point
IA	Interconnector Administrator
LDSO	Licensed Distribution System Operator
MDD	Market Domain Data
MSID	Metering System ID
NETSO	National Electricity Transmission System Operator as the holder of the Transmission Licence and any reference to "NETSO", "NGESO", "National Grid Company" or "NGC" in the Code or any Subsidiary Document shall have the same meaning.
NDCD	New Database Creation Date
P/C	Production / Consumption
SMRA	Supplier Meter Registration Agent
SPD	Settlement Period Duration
SVAA	Supplier Volume Allocation Agent
TC	Transmission Company

Acronym **Expression TCCD Transmission Company Commission Date TSBP** Transmission System Boundary Point WD Working Day

[P369]2.2 **List of Definitions**

Contracted LDSO The Contracted LDSO is an LDSO who has the obligation to provide the

SMRS service to the Registrant of the Metering System.

Control Point As defined in the Grid Code.

Declared Net Capacity In relation to a generating station, it is the output of that station to the

Total System multiplied by the relevant following constant:

• Station driven by tidal/wave power – 0.33

Station driven by wind power -0.43

Station driven by solar power -0.17

All others -1.0

This term is used in statutory instrument 2001 No. 3270 The Electricity (Class Exemptions for the Requirement for a Licence) Order 2001.

Effective From Date The Settlement day from which the BM Unit is allowed to trade.

The final Settlement day that the BM Unit is allowed to trade. **Effective To Date**

The date from 0000 hours on which the BM Unit can trade through the **NETSO Commission Date**

NETSO systems.

The date where the TC updates their system with the new BM Unit. For **New Database Creation** registration NDCD must be TCCD-2 or earlier. **Date**

Nominated Licensed The Nominated LDSO is the LDSO which has obligations to submit the **Distribution System** GSP Group Metered Volume Aggregation Rules. **Operator**

Non-Standard BM Unit A configuration of Plant and Apparatus determined by the Panel to be a

single BM Unit in accordance with BSC Section K3.1.6.

Operational Metering The metered data associated with the BM Unit which is utilised by the

TCNETSO.

Production / The flag within CRA systems which records either the fixed P/C Status

Consumption (P/C) Flag elected for an Exempt Export BM Unit by the Lead Party, or the fixed P/C

Status allocated to an Interconnector BM Unit.

Standard BM Unit A configuration of Plant and Apparatus that forms one of the single BM

Units set out in BSC Section K3.1.4.

Trading Party that will become responsible for the relevant Supplier ID. **Supplier ID Transferee**

Supplier ID Transferor Trading Party Transferring the relevant Supplier ID. Trading Agent The Balancing Mechanism Lead Party or their Agent, registered as

submitting data to or receiving data from the **TCNETSO**, in respect of BM

Units assigned to them.

Trading Point A commercial and, where so specified in the Grid Code, an operational

interface between a user and the TCNETSO, which a user has notified to

the **TCNETSO**.

Transmission Company The date from 0000 hours on which the BM Unit can trade through the

Commission Date TC systems.

All other terms are as defined in the Code

[P369]3.Interface and Timetable Information

3.1 Registration of BM Unit Associated with Metering Systems Registered with the CRA³

Steps 3.1.1 to 3.1.11 apply to Non-Standard BM Unit Applications.

Steps 3.1.12 onwards apply to both Standard and Non-Standard BM Unit Applications, and follow the preceding steps specific to Non-Standard BM Unit Applications.

A Party applying for Exempt Export status for a new BM Unit registration should follow procedures 3.1 and 3.10 concurrently.

A Party applying for Exempt Export status for an existing BM Unit does not need to follow this procedure 3.1 but should follow procedure 3.10.

Parties undertaking a Change of CVA BM Unit Lead Party for an Exempt Export BM Unit should follow procedure 3.13.

REF	WHEN	ACTION	FROM	ТО	INPUT INFORMATION REQUIRED	MEDIUM
3.1.1	At least 60 WD prior to Effective From Date (in the case of Non-Standard BM Units) If registering a Standard BM Unit go straight to step 3.1.12	If the Party does not believe the application meets the requirements for a Standard BM Unit as set out in the Code or the Party requires a Non-Standard BM Unit for another reason, submit application for Non-Standard BM Unit form. Also submit electrical single line diagram(s) clearly showing the proposed configuration, the location of the Metering Equipment, in particular the Settlement current and voltage transformers (CTs/VTs) and CT/VT ratios ⁴ , and all existing Boundary Points and any System Connection Points at or near the proposed Boundary Point(s). ⁵ , ⁶ , ⁷	Party	BSCCo	BSCP15/4.13 Application for Non-Standard BM Unit signed by an authorised person registered as such using BSCP38 ⁸ .	Email

³ Not required for Change of CVA BM Unit Lead Party unless any changes are to be made to existing registration data.

Balancing and Settlement Code
Page 17 of 88
© ELEXON Limited 2018

⁴ If the CT / VT ratios are not known 30WD / 60WD prior to the EFD, this information should be sent separately by 16WD prior to the EFD.

⁵ If a BM Unit registration is requested using Electronic File Data Transfer, the passwords and signatures are not required as the access control to the participant system is sufficient authentication.

⁶ Where the Party is applying to register two or more Offshore Power Park Modules as a Combined Offshore BM Unit, BSCCo recommends that the Party consults with the TCNETSO before submitting this form.

⁷ This information is required to help ensure the energy flow(s) for the proposed Boundary Point(s) are accounted for, where necessary (e.g. under an existing Metering Dispensation for difference metering), in the Aggregation Rules of any associated Volume Allocation Units (e.g. Interconnectors, other relevant BM Units, Grid Supply Points, GSP Groups or Distribution System Connection Points).

⁸ If the BSCP38 Authorisations process has not been completed, this form can be signed by a registered company director and accompanied by a letter on company stationery signed by the same registered company director.

3.4 [P369] Registration of Additional BM Unit (Supplier Only)

A Supplier applying for Exempt Export status for a new Additional BM Unit should follow procedures 3.4 and 3.10 concurrently.

A Supplier applying for Exempt Export status for an existing Additional BM Unit does not need to follow this procedure 3.4 but should follow procedure 3.10.

Parties undertaking a Transfer of Supplier ID whose associated BM Units include any Exempt Export BM Units should follow procedure 3.14 and, where necessary/appropriate, procedure 3.12.

A Supplier registering an Additional BM Unit for CFD Assets should not follow this procedure 3.4, but should follow procedure 3.18.

I	REF	WHEN	ACTION	FROM	то	INPUT INFORMATION REQUIRED	MEDIUM

The Supplier needs to ensure all Metering Systems associated with the additional Supplier BM Unit are re-allocated to either the Base BM Unit or another Supplier BM Unit associated with the same GSP Group (BSCP503 & 507) unless circuits are being disconnected.
 Notification of such BM Units shall be sent to the SVAA in its capacity as the Market Domain Data manager

[P369]3.6 De-Registration of Supplier BM Units following Cessation of Supplier

Note:

This process is specifically for the de-registration of Supplier BM Units when a Party ceases to be a Supplier and therefore covers both Base BM Units and any Additional BM Units registered in the name of the Supplier and subject to SVA processes. However, it does not cover de-registration of BM Units that are subject to Central Volume Allocation processes. BM Units subject to CVA processes should be de-registered in accordance with section 3.5.

This process does not apply to a transfer of Supplier ID, which should be done in accordance with section 3.14.

REF	WHEN	ACTION	FROM	то	INPUT INFORMATION REQUIRED	MEDIUM
3.6.1	As required.	Initiate Market Domain Data (MDD) process (BSCP509)	Party	BSCCo	Form BSCP509/01 & relevant part of entity forms document.	Fax / Email

Operations Registration Report (CRA – I020), BM Unit (CRA – I015).	Email / Fax Electronic

3.8 Mid-Season Changes of Generation Capacity and Demand Capacities

This process supports the Code obligation on Parties to revise GC/DC capacity of a BM Unit by an amount specified in Section K3.4.

Parties have the right to downwardly revise the magnitude of DC twice during a BSC Season when the magnitude of the capacity of a Supplier BM Unit has decreased. Parties are not permitted to downwardly revise the magnitude of GC.

Parties should note that where a revised GC/DC submission causes a Trading Unit to change its P/C Status in accordance with Section K3.5, any MVRNA Authorisation will be terminated in accordance with Section P3. Parties may therefore need to re-establish such MVRNA Authorisations in accordance with BSCP71.

Where a change in a BM Unit's Generation Capacity or Demand Capacity results in the FPN Flag being changed to "Yes" the Party is required to complete BSCP15/4.1.

REF	WHEN	ACTION	FROM	то	INPUT INFORMATION REQUIRED	MEDIUM
3.8.1	At least 1 WD prior to Effective Date.	Submit revised seasonal estimates of the maximum positive magnitude and maximum negative magnitude BM Unit Metered Volume (QM_{ij}) for relevant BM Units. [P369]3.10 Application for Exemptable Generating Plant Status and Exempt Export Status for the Associated BM Unit(s)

This process supports a Lead Party's ability under Section K1.5 to apply for Exemptable status for its Generating Plant. If the Party's application is successful, the BM Unit(s) comprising the Exemptable Generating Plant will be granted Exempt Export status.

In accordance with Sections K1.5 and K3.5, the Lead Party must elect whether the P/C Status of each of its Exempt Export BM Units is to be Production or Consumption. To do this, the Lead Party must elect a P/C Flag setting of either Production or Consumption for each BM Unit as part of its application for Exemptable Generating Plant status. The Lead Party's elected P/C Flag setting will apply from the date that the BM Unit's Exempt Export status (if granted) becomes effective. It will override the normal determination of P/C Status described in K3.5.2 such that the Exempt Export BM Unit's P/C Status will be fixed as either Production or Consumption accordingly.

Once a BM Unit has been granted Exempt Export status, its P/C Status as elected by the Lead Party through the BM Unit's P/C Flag setting does not change unless the Lead Party makes a new election (by following procedure 3.12 or 3.13 as appropriate) or the BM Unit's Exempt Export status is terminated (by following procedure 3.11).

Page 42 of 88 **Balancing and Settlement Code 22 February 2018** © ELEXON Limited 2018

³² Once Exempt Export status is terminated, the BM Unit's P/C Status will no longer be fixed by the Lead Party and will be determined in accordance with Section K3.5.2. ³³ The Lead Party can choose to register the BM Unit in a different Trading Unit by following BSCP31.

3.12 Change of Production / Consumption Status for an Exempt Export BM Unit by the Lead Party

This process supports a Lead Party's ability under K3.5 to change the previously-elected P/C Status for an Exempt Export BM Unit, by enabling the Lead Party to change the BM Unit's P/C Flag setting from Production to Consumption or vice versa.

Parties needing to elect the P/C Status of a new Exempt Export BM Unit for the first time should refer to procedure 3.10 for details of how to set the BM Unit's P/C Flag.

Where an existing Exempt Export BM Unit is the subject of a Change of CVA BM Unit Lead Party (CoBLP), Parties should follow procedure 3.13 to ensure that the Party registering the BM Unit as part of the CoBLP elects the P/C Status that it wishes to apply from the CoLBP Effective From Date. In these circumstances, it is not necessary to additionally follow procedure 3.12.

Where an existing Exempt Export BM Unit is the subject of a Transfer of Supplier ID (Change of SVA BM Units Ownership), Parties should refer to procedure 3.14 for details of how the Supplier ID Transferee is notified of the BM Unit's P/C Status. Any Supplier ID Transferee wishing to change the Exempt Export BM Unit's P/C Status should follow this procedure 3.12.

REF	WHEN	ACTION	FROM	то	INPUT INFORMATION REQUIRED	MEDIUM
3.12.1	From time to time if the Lead Party requires	Submit notice to the CRA, copied to BSCCo, requesting a change to the Production / Consumption Flag for an Exempt Export BM Unit. [P369]3.13 Change of CVA BM Unit Lead Party

NOTE: Suppliers taking part in this process must have satisfied the criteria detailed in 3.14 and registered with the CRA.

Prior to initiating this process the Party registering the BM Unit(s) as part of the Change of BM Unit Lead Party (CoBLP) is required to have acceded to the BSC and completed Party registration and qualification. If appropriate, the Party should also have completed all the TCNETSO requirements.

The timescales noted within this process are based on the existing MSID(s), BM Unit(s) and Trading Unit registrations being transferred from one Party to another with the associated Meter Technical Details (MTDs), Metering Dispensation(s) and Aggregation Rules. If Parties wish to change any of these registrations (for example to effect changes to configuration and entity Ids) then additional BSCPs may need to be followed and/or the lead-time for completing the process may be increased. Where this applies, Parties should contact BSCCo for advice on the process to be followed and documentation required.

If there are no changes to the registration data associated with the BM Units and the prerequisites stated have been met then Parties may use this process in order to transfer BM Unit(s) and associated MSID(s), MTDs, Metering Dispensations, Aggregation Rules and an associated Trading Unit through this procedure. Under these circumstances Parties will not be required to carry out additional steps in this BSCP, BSCP20, BSCP31, BSCP32 and BSCP75 in order to complete the transfer.

Where a BM Unit is already an Exempt Export BM Unit, the Party registering the BM Unit as part of a CoBLP is required to elect the P/C Flag setting (and thereby the P/C Status) which will apply to the Exempt Export BM Unit from the Effective From Date of the CoBLP. All other registration details (including the Exempt Export BM Unit's Trading Unit) will be unchanged unless a change is expressly requested. Where this applies, Parties should contact BSCCo for further information.

Parties wishing to apply for Exempt Export BM Unit status should refer to procedure 3.10.

REF	WHEN	ACTION	FROM	то	INPUT INFORMATION REQUIRED	MEDIUM
3.13.1	If required and at least 3 WD prior to 3.13.3	Request details of current registrations of BM Unit(s), any associated MSID(s) including any metering dispensations associated with the MSID(s), and of Trading Unit(s). BSCCo		Party Name and ID.	Internal Process

3.16 Application Process for Credit Qualifying BM Unit Status

This process supports the request from a Lead Party to be classified as a Credit Qualifying BM Unit as set out in Section K3.7.3.

It should be noted that an application under Section K3.7.3(c) should only be made where the criteria set out in K3.7.1(a) and (b) have been satisfied and the BM Unit does not already meet the criteria in K3.7.2(a) and (b) (i.e. it is not a Production BM Unit or an Exempt Export BM Unit).

The Panel shall determine that the BM Unit should be treated as a Credit Qualifying BM Unit if the Panel determines that the BM Unit's Metered Volume data for the previous 6 months complies with the following:

- For the majority of Settlement Periods the BM Unit's Exports exceeded its Imports; and
- For that 6 month period overall, the BM Unit's Exports exceeded its Imports.

³⁹ BM Unit registration timescales may be reduced in certain circumstances if the registering Party agrees that the registration will not be withdrawn or amended after the 'point of no return'

De-Registration of Additional BM Units for CFD [P369]3.19

REF	WHEN	ACTION	FROM	то	INPUT INFORMATION REQUIRED	MEDIUM
3.19.1	As required ⁴⁰	Instruct de-registration details	CFDSSP	BSCCo	De-registration details, including CFD ID, GSP Group, and whether to deregister based on specific Supplier ID(s) or list maintained in 3.20	
3.19.2	Following 3.19.1	Acknowledge and validate request, including Effective To Dates of request and MDD timetable (Effective To Date must be on or after the MDD Go Live Date and registration request must be at least 20 WD prior to Effective To Date.)	BSCCo	CFDSSP	As submitted in 3.19.1	
3.19.3	At least 20 WD prior to Effective To Date	Initiate Market Domain Data process (BSCP509) ⁴¹	BSCCo		Based on list maintained under 3.20 and details provided in 3.19.1	Internal Process
		Submit de-registration of BM Unit form	BSCCo	CRA	BSCP15/4.2, De-Registration of BM Unit	Email
3.19.4	Upon receipt of 3.19.3	Check the form for completeness and authorisation	CRA			Internal
3.19.5	Within 1 WD of 3.19.4	Acknowledge de-registration request. Where FPN set to 'yes', notify TCthe NETSO ⁴² .	⊄CRA	BSCCo TCNETSO		Email
3.19.5	At the same time as 3.19.4	Notify the SVAA of the BM Unit. ⁴³	CRA	SVAA ⁴⁴		Email

⁴⁰ Typically this will be when the CFD comes to an end and the Additional BM Unit is no longer required for CFD. Suppliers should ensure any MPANs are re-allocated to another appropriate BM Unit. Any Metering Systems not re-allocated will be assigned to the relevant Supplier's Base BM Unit by SVAA.

⁴¹ BSCCo to initiate BSCP509 before the de-registration form is submitted to the CRA

⁴² Where the BM Unit has a FPN set to No, the Transmission CompanyNETSO does not need to be informed of the De-Registration

⁴³ The Supplier needs to ensure all Metering Systems associated with the additional Supplier BM Unit are re-allocated to either the Base BM Unit or another Supplier BM Unit associated with the same GSP Group (BSCP503 & 507) unless circuits are being disconnected.

⁴⁴ Notification of such BM Units shall be sent to the SVAA in its capacity as the Market Domain Data manager

REF	WHEN	ACTION	FROM	то	INPUT INFORMATION REQUIRED	MEDIUM
3.19.6	At least 15 WD prior to Effective To Date	Confirmation of Effective To Date.	CRA	TCNETSO / Party	Confirmation of Effective To Date	Email
3.19.7	On or before Effective To Date	Update systems and provide Party, BSCCo, TCNETSO and BSC Agents with registration reports.	CRA	Party	Registration reports of data entered onto systems – Registration Report (CRA-I014),	Electronic
				TCNETSO and BSCCo	Operations Registration Report (CRA – I020),	
				BSC Agents	BM Unit, Interconnector and GSP Group Data (CRA-I015).	

3.20 Additional BM Unit Sets for CFD

BSCCo is required by the Code to maintain a list of Active Power Purchasing Suppliers (Suppliers with HH Active Export greater than zero) within each GSP Group to support the registration and deregistration of Additional BM Units for CFD purposes. Suppliers may optin and opt-out of this list. Any CFDSSP request supersedes any Supplier request or BSCCo list update. Any Supplier request supersedes any BSCCo list update. Suppliers can request the list from BSCCo via the BSC service desk.

REF	WHEN	ACTION	FROM	то	INPUT INFORMATION REQUIRED	MEDIUM
3.20.1	As required	Request inclusion/exclusion from list	Supplier / CFDSSP	BSCCo	Supplier ID, GSP Group and details of request	Email
3.20.2	Within 5 WD of 3.20.1 and before 3.20.3	Validate and acknowledge request. Where request from Supplier check for authorisation (as per BSCP38)	BSCCo	Supplier / CFDSSP	As submitted in 13. 20.1	Email
3.20.3	Following 3.20.2 and at least quarterly	Update list	BSCCo		As submitted in 13.20.1 and based on those active Half Hourly Export Suppliers within each GSP Group	Internal Process

Is this BM Unit registration: [] a New BM Unit Registration [] a Change of registration data associated with a Change of BM Unit Lead [] subject to a Registration Transfer in accordance with BSCP68 [] a change in status of a BM Unit's FPN Flag [] a change in the Switching Group to which the BM Unit belongs [] An Additional BM Unit registration for CFD Assets [] An Additional BM Unit registration under instruction of the CFDSSP (or should tick this box)	

(Tick as appropriate)

If you wish to apply for Exempt Export status for a new BM Unit registration, you must enter "Yes" in the appropriate box on Page 2 of this form 4.1 and must also follow the application process for Exemptable Generating Plant/Exempt Export BM Unit status in procedure 3.10 of this BSCP. If you are applying for Exempt Export status for an existing BM Unit, you do not need to complete form 4.1 but must follow procedure 3.10.

⁴⁵ Lead Parties of BM Units with associated CVA Metering Systems, Additional BM Units, Base BM Units and Interconnector BM Units should complete this form BSCP15/4.1 in accordance with Section 3.1.5 of this document. In the case of Base BM Units this form should be used to complete the Base BM Registrations by providing, for example, the initial GC/DC values and if appropriate the FPN Flag.

[P369]BSCP15/4.1 Registration of BM Unit (cont)

	BM Unit Registration Details												
BN	M Unit Id			BM Unit Type ⁴⁷	BM Unit Configuration ⁴⁸	GSP Group Id ⁴⁹	LDSO Party Id	DC (MW)	Interconnector BM Unit P/ C Flag 50	Flag	Exempt Export (optional) ⁵¹	Inter- connector Id ⁵²	EFD

Note: If BSCCo are registering one or more Additional BM Units under instruction from the CFDSSP, spreadsheets or other suitable formats may be used to detail the registration details. Additional BM Units for CFD Assets must be of BM Unit Type 'S' and follow the naming convention for the BM Unit ID and BM Unit Name on the BSC Website

ſ	For Embedded and Directly Connected BM Units, tick to confirm that an electrical single line diagram(s) showing the location of the Metering Equipment, in
	particular the Settlement current and voltage transformers (CTs/VTs) and CT/VT ratios ⁵³ , and all existing Boundary Points and any System Connection Points at or
L	near the proposed Boundary Point(s) is attached to the application.

⁴⁶ The NGC BM Unit ID must be provided for all BM Units with the FPN Flag set to 'Y'.

⁴⁷ E – Embedded, I – Interconnector, G – Base Supplier S – Additional Supplier, T – Directly Connected

⁴⁸ CCGT – CCGT registered in CMRS, PPM – a single Power Park Module registered in CMRS, COBMU – a Combined Offshore BM Unit comprising 2 or more Offshore Power Park Modules registered in CMRS, GU – Generating Unit registered in CMRS, DC – Directly Connected Circuit at Customer (Supplied by BSC Party) Premises, IC – Interconnector Unit, BB – Base BM Unit, AB – Additional BM Unit, NS – Non-Standard.

⁴⁹ If unit type E or S

⁵⁰ Only applicable for Interconnector BM Units, which are registered in fixed Production/Consumption pairs whose P/C Status does not change (Section K3.5/K5.5). A Party applying for Exempt Export status must follow procedure 3.10 to elect the Exempt Export BM Unit's P/C Flag.

⁵¹ To apply for Exempt Export status for a new BM Unit registration, enter "Yes" and follow procedure 3.10 of this BSCP.

⁵² If BM Unit Type is I

⁵³ If the CT/VT ratios are not known 30WD / 60WD prior to the EFD, this information should be sent separately by 16WD prior to the EFD.

4.9 BSCP15/4.9 Certification of Exemptable Status for Generating Plant With Exports Measured by SVA Metering Systems

Part A Page 1 of 2 To: **BSCCo** Date Sent: Certification of Exemptable Status for Generating Plant With BM Unit ID: Exports Measured by SVA Metering Systems From: Company Details Party Id: Name of Sender: Contact email address: Our Ref: Contact Tel. No. I, the Director of the Party responsible for and requesting Exemptable Generating Plant status ⁶², and thereby Exempt Export BM Unit status for _ 63 ('the Party') hereby certify that from _ The Generating Plant is Exemptable as defined in Section K1.2.2 of the Code and the BM Unit would, if the Metering Systems comprised in that BM Unit(s) were CVA registered, satisfy the following criteria in accordance with Section K3.3A of the Code: 1. Only one Party (the Party hereby requesting Exempt Export status) is responsible for Exports and / or Imports from Plant / Apparatus comprised in the BM Unit; The Exports and/or Imports from and to the Plant / Apparatus are capable of being controlled independently of the Exports and/or Imports from or to any Plant / Apparatus not comprised in the BM Unit: 3. Exports and/or Imports can be determined separately for Plant / Apparatus comprised in the BM Unit; OR, the Panel, in accordance with Section K3.1.6, has determined that the BM Unit in question has best satisfied these requirements. I hereby provide notification in accordance with Section K3.5 that the Party elects the P/C Flag of the BM Unit to 65 should the BM Unit be granted Exempt Export status. The Party will take all reasonable steps, in accordance with Section U1.2.3, to ensure that the data and information held or maintained by BSCCo, any BSC Agent, or any SMRA relating to the Party, with specific reference to this application, is and continues to be accurate and complete. BSCCo can rely on this certification as to the matters set out herein, for the purposes of verification of Exemptable Generating Plant status (and associated Exempt Export BM Unit status), i.e. the matters set out above in (1) to (4). The Party undertakes to comply with any request to re-certify made by BSCCo in accordance with Section K 1.5.8. Name of Director:

[P369]4.10 BSCP15/4.10 Application for Inclusion in BSC Website List of Suppliers which have Satisfied the Criteria to Complete a Change of BM Unit Lead Party within 5 WD for a BM Unit with CVA Metering and Associated with a Customer Premises

Page 1 of 2

To: BSCCo	Date Sent:	
From: Participant Details		
Party ID:	Name of Sender:	
Contact email address:		
Our Ref:	Contact Tel. No.	
Name of Authorised Signatory (Category A in BSCP38):		
Authorised Signature:	Password:	

I confirm that the Party above has met the following criteria and is therefore applying to be included in the BSC Website list of Suppliers which have satisfied the criteria to complete a change of BM Unit Lead Party within 5 WD for a BM Unit with CVA metering and associated with a Customer premises:

- The Party has acceded to the BSC and completed Party registration in the role of Supplier;
- The Party has appropriate registration on Transmission Companythe NETSO Systems, and use of a qualified Trading Agent and Trading Point.

By returning this form, I acknowledge that the above Party undertakes to provide written notice by a Category A authorised signatory to BSCCo within 1 WD of any change in its ability to meet these criteria. I confirm that the above Party also recognises that such a change will result in the Party being removed from this list.

I acknowledge that the above Party recognises that, in order to qualify for a change of BM Unit Lead Party within 5 WD, the following criteria (unique to the specific registration) must also be satisfied:

- The BM Unit is not associated with a Trading Unit except a Sole Trading Unit; and
- The de-registration form (BSCP15/4.2) and registration form (BSCP15/4.3) submitted by the outgoing and incoming Suppliers contain consecutive Effective To and From Dates (in order to demonstrate that both Suppliers are aware of, and agree with, the change of Lead Party).

Application:

The Plant and Apparatus does not fall into one of the standard categories in K3.1.4	
The Plant and Apparatus does fall into one of the standard categories in K3.1.4 but a different configuration satisfies the requirements for BM Units in K3.1.2	
The Plant and Apparatus Exports or Imports are at a CVA Boundary Point at which there are other Exports or Imports for which another person is responsible (the Plant and Apparatus may or may not be of a Standard BM Unit configuration)	
Description of Non-Standard BM Unit configuration	
Please contact BSCCo for guidance on how to complete this section	
Please provide electrical single line diagram(s) of the Plant and Apparatus included in the Non-Standary Standard) BM Unit(s) to support your application. The diagrams need to clearly show the location Metering Equipment, in particular the Settlement Current and Voltage Transformers (CTs/VTs) and ratios, all existing Boundary Points and any System Connection Points at or near the proposed Boundary and which items of Plant and Apparatus comprise which Non-Standard (and any Standard) BM Unit(s).	on of the d CT/VT
any Standard) BM Unit(s) to support your application. The diagrams need to clearly show the location Metering Equipment, in particular the Settlement Current and Voltage Transformers (CTs/VTs) and ratios, all existing Boundary Points and any System Connection Points at or near the proposed Boundary	on of the d CT/VT y Point(s)

Rationale

Rationale with reference to BSC Section K3.1 for the request for the Non-Standard BM Unit: *Please contact BSCCo for guidance on how to complete this section*
