Purpose For information

Additional MDD Publish: Expected data not present in MDD Version 300

Due to an error in the loading process, the Market Domain Data (MDD) Version 300 published on 12 August 2020 (with a Go-Live date of 19 August 2020) does not include the expected Technical Product Deliverables (TPDs) as per Change Request M3594.

To rectify this, ELEXON will be performing an additional publish (v301) on 19 August 2020 with a Go-Live date of Wednesday 26 August 2020. This will be circulated to parties via the normal MDD communication routes.

Due to the missing data in MDD Version 300, all Parties are required to take one of the following actions:

- Load the full version (D0269) of MDD Version 300 and the incremental version (D0270) of MDD Version 301; **or**
- Load the full version (D0269) of MDD Version 301; **or**
- Load the incremental version (D0270) of both MDD Version 300 and of 301.

The D0270 flow in V301 will only contain the records for the TPDs. This will mean that the MDD version due to Go-Live on Wednesday 26 August 2020 will be incremented to MDD version 301 – dates for MDD Version 300 will be unaffected. All future versions of MDD will be incremented by one.

Background

At the Supplier Volume Allocation Group (SVG) meeting 234 on 4 August 2020, the SVG approved Change Request M3594 to implement the new TPDs in MDD v300. The Effective From Date of the TPDs is 07 September 2020. To be implemented in MDD by 07 September, an Additional MDD Publish is necessary. The updated TPDs will be implemented in the Supplier Volume Allocation Agent (SVAA) systems for use in Settlement from 7 September 2020.
