

## ANNEX A – PROPOSED TEXT TO MODIFY THE BSC

### Section K

#### 1.3A Election to treat as a Systems Connection Point

1.3A.1 In relation to a point of connection (whether consisting of one or more circuits) between two or more Distribution Systems in the same GSP Group, the Distribution System Operators of such Distribution Systems may elect that such point shall be treated as a Systems Connection Point for the purposes of the Code, subject to paragraph 1.3A.4.

1.3A.2 An election under paragraph 1.3A.1:

- (a) shall be made by notice given by each of the relevant Distribution System Operators to BSCCo in accordance with BSCP 20, which notice shall nominate in accordance with paragraph 1.3.3 which of the Distribution System Operators is to be responsible for such point of connection;
- (b) shall be effective 20 Business Days after such notice is given;
- (c) may be withdrawn by notice to BSCCo given by any of such Distribution System Operators in accordance with BSCP 20, with effect 20 Business Days after such notice is given.

1.3A.3 References in the Code to a Systems Connection Point include such a point of connection for which such an election has been made and is effective, subject to paragraph 1.3A.4.

1.3A.4 The flows of Active Energy at such a point of connection shall not be taken into account in determining GSP Group Metered Volume, or otherwise in Supplier Volume Allocation; and accordingly the Aggregation Rules referred to in Section R3.2.3(b)(i) shall be such as to exclude the metered data relating to such point from being counted (or to adjust such data so as to be counted only with a zero value) in the determination of GSP Group Metered Volume.

### Annex X-1

Amend definition of Systems Connection Point:

"... two or more Systems excluding (subject to Section K1.3A.3) a point of connection ..."
