

P213 TRANSMISSION COMPANY ANALYSIS AND IMPACT ASSESSMENT – RESPONSE PRO-FORMA

In accordance with paragraph F 2.8 of the Code, please respond to the following questions concerning P213 (including the rationale for each response):

Q	Question	Response
1	Please outline any impact of the Proposed Modification and the potential Alternative Modification on the ability of the Transmission Company to discharge its obligations efficiently under the Transmission Licence and on its ability to operate an efficient, economical and co-ordinated transmission system.	No impact is expected since P213 and the potential Alternative Modifications propose changes for the settlement of micro-generation at the SVA level. Changes at the SVA level typically have no impact on National Grid. No changes are proposed at CVA level which would have more potential for impact on National Grid.
2	Please outline the views and rationale of the Transmission Company as to whether the Proposed Modification and the potential Alternative Modification would better facilitate achievement of the Applicable BSC Objectives.	National Grid agrees that P213 and the potential Alternative Modifications would improve and facilitate the administration of the settlement arrangements for micro-generation and therefore we believe that this would better facilitate the achievement of the applicable BSC Objectives.
3	Please outline the impact of the Proposed Modification and the potential Alternative Modification on the computer systems and processes of the Transmission Company, including details of any changes to such systems and processes that would be required as a result of the implementation of the Proposed Modification the potential Alternative Modification.	As the changes proposed in P213 and the Alternative Modifications would occur at the SVA level we do not believe there will be any impact on the computer systems and processes of National Grid.
4	Please outline any potential issues relating to the security of supply arising from the Proposed Modification and the potential Alternative Modification.	None
5	Please provide an estimate of the development, capital and operating costs (broken down in reasonable detail) which the Transmission Company anticipates that it would incur in, and as a result of, implementing the Proposed Modification and the potential Alternative Modification.	None
6	Please provide details of any consequential changes to Core Industry Documents and/or the System Operator Transmission Owner Code that would be required as a result of the implementation of the Proposed Modification and the potential Alternative Modification.	None
7	Any other comments on the Proposed Modification and the potential Alternative Modification.	No

Please send your response by **12 noon** on **Friday 15 June 2007** to modifications@elexon.co.uk. Any queries regarding the analysis should be addressed to Ysanne Hills on 0207 380 4162 or email address ysanne.hills@elexon.co.uk.
