

Meeting name	BSC Panel
Date of meeting	14 March 2007
Paper title	Draft Modification Report for P210
Purpose of paper	For Decision
Synopsis	This paper summarises the Proposed and Alternative solutions and recommendations for Modification Proposal P210.

1 Proposed Modification

- 1.1 Proposed Modification P210 seeks to revise or clarify the Code text in relation to the process of single notification for the purposes of removing the potential for misinterpretation and to ensure that established conventions and practices (and the efficiencies associated with those) are maintained. The Proposal would ensure that the text relating to the notifications processes in Section P of the Code is unambiguous and in accordance with existing conventions, general understanding, industry practice and the Energy Contract Volume Allocation Agent (ECVAA) Service Description. If approved, the Proposed Modification would be implemented on the date on which P210 was raised (5 February 2007)

2 Alternative Modification

- 2.1 Alternative Modification P210 is identical to the Proposed Modification but would have an Implementation Date of 1 day after the Authority's decision.

3 Recommendations

- 3.1 Having considered and taken into due account the contents of the P210 draft Modification Report, the Panel is invited to recommend:
- a) **CONFIRM** that Proposed Modification P210 should not be made;
 - b) **CONFIRM** that Alternative Modification P210 should be made;
 - c) **APPROVE** an Implementation Date for Proposed Modification P210 of 5 February 2007;
 - d) **APPROVE** an Implementation Date for Alternative Modification P210 of 1WD following an Authority decision;
 - e) **APPROVE** the proposed text for modifying the Code, as set out in the Modification Report; and
 - f) **NOTE** to the Authority that the Panel has authorised changes to BSCP71 that will be implemented concurrent with P210, should P210 be approved.

Chris Rowell

Modifications Secretary
