**7 August 2006**

# Data Provided

---

**The following slides provide imbalance pricing data to support progression of Modification Proposal P205 – ‘Increase in PAR level from 100MWh to 500MWh’**

**Data is provided for the baseline average methodology and under P194 (for PAR = 100 and PAR = 500) as follows:**

- PAR as a percentage of NIV (05/06)
- Settlement Period prices and NIV for sample Settlement Days (05/06)
- Average Imbalance Prices by Month (05/06)
- Average SSP and SBP as Main Price by Settlement Period (04/5 and 05/06)
- Average Main Price to Market Price differential by Settlement Period (04/5 and 05/06)

**Sample Settlement Period data for 04/05 from the P194 Assessment Procedure is provided separately**

**Raw data for the period 04/06 is provided in a separate spreadsheet**

# Data Provision Dates – 05/06
