Validity Constraints
- No allowance is included for the final solution being different from the MP   - No allowance is included for supporting PwC activities. Any effort will be charged at contracted T&M rates   - No allowance is included for supporting ELEXON assurance activities. Any effort will be charged at contracted T&M rates   - No allowance is included for End to End/Participant Testing activities. Any effort will be charged at contracted T&M rates   - No allowance is included for Walkthrough activities. Any effort will be charged at contracted T&M rates   - The validity period for this quote is 30 days.

Authorised Signature	Date Signed

Requirements and Solution

Brief Summary of Change

The modification seeks to remove a possible anomaly from the BSC Code and make sure current working practice is maintained. As such there is no impact on the LogicaCMG systems or documents.

The working group have said (In section 4.3 of P162AC10) that the cost justification for this modification will be based upon the market participants not changing their metering registrations.

This assessment is against the P162 Version 1.0 dated 30th January 2004 and P162AC10 version 1.0 dated 2nd March 2004.

LogicaCMG's Proposed Solution

The modification does not impact LogicaCMG systems or documents.

Deviation from ELEXON's Solution / Requirements

None

Operational Solution and Impact

None

Testing Strategy

Unit		Change Specific		End to End	
Module		Operational Acceptance		Participant Testing	
System		Performance		Parallel Running	
Regression		Volume		Deployment/ Backout	

Other:

Validated Assumptions

The working group have said that the cost justification for this modification will be based upon the market participants not changing their metering registrations.

Outstanding Issues

We have assumed that the participants will continue to register metering systems, aggregation rules and BM Units in the same way as now.
