

**Draft Change Proposal – BSCP40/01**

DCP No: 0019

*Version No: 1.0  
(mandatory by BSCCo)***Title** *(mandatory by originator)*

Inconsistencies within the ECVAA Service Description

**Description of Problem/Issue** *(mandatory by originator)*

As part of the procurement phase of Project Isis, ELEXON drafted detailed contracts of Business Requirements for the CVA, SVA and FAA Agent Services to issue to tenders. The Business Requirements were also reviewed against the BSC and Code Subsidiary Documents as part of a due diligence exercise.

As a result of this review a number of minor inconsistencies have been discovered in the ECVAA Service Description. These inconsistencies are detailed below.

**Justification for Change** *(mandatory by originator)*

The updates to the Service Description are necessary to make sure that the new contracts in February 2009 are consistent with the Business Requirements of the CVA/SVA Operator Hosts.

**Proposed Solution(s)** *(mandatory by originator)*

DCP0019 intends to amend the ECVAA Service Description to remove the minor inconsistencies and to reflect the new Business Requirements that are required.

The following list identifies the inconsistencies in the ECVAA Service Description.

Issue No	Description
1	The ECVAA Service Description should be updated to reflect the Code requirement to receive and process Forward Contract Report Start Date Override Requests.
2	The ECVAA Service Description should be updated to reflect that additional Forward Contract (7 day) reports are produced at 4 times during the business day.
3	The Service Description should be updated to reflect that in exceptional circumstances Registration Data, ECVNs and MVRN may need to be input manually.
4	Section 10 (Credit Check Calculations) of the ECVAA Service Description should be updated to reflect the requirement that the ECVAA should calculate the Credit Cover Percentage value.
5	Section 13.1, Footnote 4 “ <sup>4</sup> For a Period of one month after the effective date of this Service Description, when a Credit Default Rejection Period commences in relation to a particular Trading Party, EVVAA will continue to inform BSCCo, who will post a notice on the BSC Website.” is redundant and should be removed.
6	BSCP71 (Section 1.1) refers to optional feedback reporting. This functionality is not referenced in the ECVAA SD. Although this requirement has been included in the Service Requirement Schedule it should be added to the Service Description.
7	Update the ECVAA URS and NETA IDD Part 1 to change the descriptions of ECVAA-I009 and ECVA-I0010 from ‘Feedback’ to ‘Rejection Feedback. These flows are not mentioned in the ECVAA Service Description and should be added.
