1. INTRODUCTION

1.1 Scope and Purpose of the Procedure

This BSC Procedure covers the provision of Output Data and Market Indicator Data to the Performance Assurance Reporting and Monitoring System (PARMS) or the Performance Assurance Administrator (PAA). The data will be utilised within the following PARMS techniques.

- Technical Assurance
- Removal of Qualification
- Monitoring and Reporting
- Peer Comparison (public and non public)
- Supplier Charges
- Error and Failure Resolution

The procedure will also cover the following techniques that are associated with the PARMS Service:

- (i) Monitoring and Reporting; and
- (ii) Peer Comparison (public and non-public)

The process will not cover internal activities carried out by the Performance Assurance Administrator at the BSCCo.

All data specified in this BSCP to be sent to PARMS should be emailed to parms@parms.bsccentralservices.com.

All data specified in this BSCP to be sent to PAA should be sent to paa@elxon.co.uk.

All PARMS reports will be issued from donotreply@parms.bsccentralservices.com.

All PARMS queries should be raised via the BSC Service Desk (email: bscservicedesk@logica.com; telephone: 0870 010 6950).

1.2 Risk Based Performance Assurance Framework

Performance Assurance Techniques (PAT) will be applied to a Performance Assurance Party (PAP) based on the net significance of the applicable Settlement Risk and an assessment of the PAP's contribution to the Settlement Risk. Those PATs that are mandated under the BSC will continue to be applied, regardless of the net significance of the applicable Settlement Risk.

Settlement Risks and their net significance are captured on the Risk Evaluation Register (RER). All the Settlement Risks identified are rated in terms of severity of impact and probability (including a weighting for the strength of controls).

The Settlement Risks are assigned PATs to mitigate those risks and these PATs are recorded in the Risk Operating Plan (ROP) against each Settlement Risk.

The RER and the ROP are produced for a Performance Assurance Operating Period in accordance with the Annual Performance Assurance Timetable and the agreed Risk Evaluation Methodology (REM), which details the processes used to identify and evaluate the Settlement Risks and assess their materiality.

A Risk Management Plan (RMP) is created for each PAP based on the RER and the ROP and in accordance with the REM. The RMP will detail the PATs that will be deployed to a PAP during the course of a Performance Assurance Operating Period based on the Settlement Risks that are applicable to that PAP and the extent that the Settlement Risk applies to the PAP. If a PAP disagrees with their RMP, then there are provisions within the Code for them to query or appeal against it.

At the end of a Performance Assurance Operating Period, the Performance Assurance Board (PAB) will prepare an Annual Performance Assurance Report for the Panel detailing the assurance that has been provided during the course of the period, the extent to which Settlement Risks have been mitigated, and BSCCo costs of providing that assurance.

1.3 Main Users of the Procedure and their Responsibilities

This procedure will be used by authorised staff from Suppliers, Supplier Agents, SMRAs and BSC Agents. BSCCo will use this procedure for the provision of Market Indicator and standing data to the PAA. The procedure also provides an interface to data providers and to the BSC Panel and PAB (which will receive reports via this procedure).

The procedure will be used by the PAA for the collation and validation of data.

Throughout this procedure timescales are referred to in relation to the number of working days (WD), unless specifically stated otherwise. Where this procedure requires a communication to be issued on a given working day, users are asked to note the provisions for deemed receipt of post, fax and email set out in Section H of the BSC. When using email, users are advised to send the communication by 1600 hours in order to ensure its delivery by 1700 hours.

1.4 Use of the Procedure

The procedure provides details of the manner in which data should be provided to PARMS, the BSC Service Desk or the PAA, the process for querying the data and the manner in which Ad hoc and Drill Down data can be obtained.

1.5 Balancing and Settlement Code Provision

This BSC Procedure has been produced in accordance with the provisions of the Balancing and Settlement Code, in particular Section S-1, Section J and Section Z. In the event of an inconsistency between the provisions of this BSC Procedure and the Code, the provisions of the Code shall prevail.

1.6 Associated Documents

This BSC Procedure interfaces with:

1.8.2 Definitions

Routine Performance Monitoring Report: is a monthly report, in respect of performance against the serials specified within the calculation guidelines, as being part of the suite of serials that contribute to the Routine Performance Monitoring Report, submitted by each Supplier, or by the Supplier's appointed agents on behalf of each Supplier, for each GSP Group (or across all GSP Groups, as specified in the calculation guidelines) in which it is operating, or by a SMRA for SMRA serials.

Routine Performance Monitoring Log: will contain the Drill Down or Ad-hoc Data requested of Suppliers by the PAA, in agreed format and timescales.

Drill Down Data: is the data that is required such that:

- (a) a calculation, the output of which is included within the Supplier's Routine Performance Monitoring Report, can be re-performed; and
- (b) the context and variability of a measure that is included within the Supplier's Monthly Performance Report can be established.

Drill down data requests can be made within 3 months of receipt of validated reports.

Ad-hoc Data: Any additional Performance data which can be requested only by a specific PAB mandate. It is assumed that such data will not be required on a regular basis.

Late Data: If data is not received by its due date, as stated within the calendar published by the PAA (see Appendix 5.9), it will be defined as late.

Output Data: is the performance data supplied, as referred to in paragraphs 5.2 to 5.5 by the Data Providers for input into the PARMS I.T. system.

Market Indicator Data: is data supplied as referred to in paragraph 5.8.

Data Provider: is a party responsible for providing data directly into PARMS. Data Providers are the CDCA, Suppliers (or Supplier Agents on behalf of their Suppliers), SMRAs, SVAA and the PAA.

Timing of activities: For the purposes of this BSCP and its Appendices +(x) WD means a number of WD exclusive of and following the day on which the start event occurs. -(x) WD means a number of WD exclusive of and prior to the day on which the start event occurs.

PARMS: Throughout this procedure PARMS refers to the PARMS IT system and PAA refers to the activities carried out by BSCCo in accordance with Section Z of the BSC.

Service Level: The level of performance should be achieved against each Serial and Standard as stated in the Calculation Guidelines (refer to Appendix B PARMS Calculation Guidelines)

5. APPENDICES

5.1 Report Formats

A standard format for the submission of all data items will be used based upon the information contained within the appendices associated with this BSCP (Appendix A: PARMS Data Provider File Formats and Appendix B: PARMS Calculation Guidelines).

Data Files will be provided in the agreed formats by Email message addressed to PARMS.

NOTE: Data Providers must ensure that their files have undergone appropriate virus checking. Infected Emails are automatically deleted by PARMS and no notification sent to the Data Provider. Emails deleted for this reason will not be considered as having been delivered.

5.2 Supplier Output Data Provision

Suppliers must ensure output data is provided for all Serials for each GSP Group that they are trading in according to whether they operate within the NHH or HH markets (or both).

For DCs and MOAs, Suppliers should ensure data is provided only for those agents they are using.

Suppliers are responsible for providing submissions up to the Final Reconciliation Volume Allocation Run for the last Settlement Day in which they are involved in a GSP Group. For most Serials this may well require Suppliers to provide reports containing zeros. This is necessary for completeness checking.

The table below defines the data that will be provided to PARMS by Suppliers (or Supplier Agents on behalf of Suppliers). The 'FILETYPE' column references the SVA Data Catalogue. The 8 digit references beginning with a 'P' have an equivalent Technical Specification data flow. **These data items make up the PARMS Routine Performance Monitoring Reports.**

5.9 Frequency of Report and Data Submission

Output Data Reports should be provided to PARMS in accordance with the following timetable:

Note: Data Providers are asked to note the provisions for deemed receipt of email communications as set out in Section H of the BSC, and are advised to send Output Data Reports by 1600 hours in order to ensure their delivery to PARMS by 1700 hours. Reports sent after 1600 hours and delivered by 1700 hours will still be counted as submitted on that working day. However, any Data Provider sending an

Output Data Report after 1600 hours will bear the risk of its non-delivery by 1700 hours – and therefore the risk of the report being counted by PARMS as a late submission.

Data Provider	Timescale
Supplier (Routine Performance Monitoring Reports)	20 WD after last calendar day of each month
Supplier (Routine Performance Monitoring Logs)	As agreed with the PAA.
SMRA	10 WD after last calendar day of each month
SVAA	7 WD after last calendar day of each month or quarter as appropriate with the exception of: <ol style="list-style-type: none"> 1. Market Indicator data – 1 WD after the end of the previous week 2. MDD – as specified in BSCP509 3. Information on GSP Group Take and Supplier Group Take (needed for calculation of SCs) – 20 WD after last calendar day of each month. 4. Annual GSP Group Take Data – 20 WD after last calendar day of each financial year.
Standing Data (SVAA)	1 WD after update
Standing Data (Supplier DPI file)	15 WD after last calendar day of each month

Note: Data from SVAA relates to Volume Allocation Runs carried out by SVAA in the previous calendar month.

A calendar stating specific dates for receipt of data will be published by the PAA on a yearly basis.

The table below defines the timing requirements for the relevant parties to provide data to PARMS for analysis of Market Indicators.

Market Indicator	Frequency
Energy Settlement mix	Weekly
Energy Breakdown (Settlement Period and BM Unit)	Weekly
Energy Breakdown (BM Unit)	Weekly

5.10 Standing Data

The following standing data will be maintained by PARMS. An SVA Data Catalogue Flow Reference number has been assigned where appropriate which relates to a Technical Specification data flow within the SVA Data Catalogue:

Authorised Data Providers

Suppliers must make the BSC Service Desk aware of any changes to their authorised Data Providers by using form F533/01.

Supplier Charges

- National Monthly Cap for each year
- Annual GSP Group Take Data (provided by SVAA) – SVA Data Catalogue **Flow Reference P0125001**
 - For each GSP Group, the total GSP Group Take in the previous 12 months
 - The total GSP Group Take for all GSP Groups in the previous 12 months
- Supplier Payment Disbursement Factor
- Trading Parties Payment Disbursement Factor
- Performance Level for each Supplier Serial/Standard and SC payable per unit of failure to meet the level
- Trading Party Main Funding Shares for each month
- Apportionment data (provided by SVAA or determined from data provided by SVAA) – SVA Data Catalogue **Flow Reference P0120002**.
 - For each Supplier in a GSP Group, the Total Supplier deemed take for each month
 - For each GSP Group the total GSP Group take for each month
 - For each Supplier in a GSP Group, the Supplier NHH Energy for each month

- For each GSP Group, the Total NHH Energy in GSP Group for each month

Market Domain Data

MDD is required so that the performance data received can be validated. The data will be provided by the SVAA.

The categories of MDD that will be maintained are:-

- GSP Groups
- Market participants
- Market participant roles (supplier, NHHMOA, HHMOA, NHHDC, HHDC, NHHDA, HHDA, SMRA)
- Reconciliation Run types

Output Data Schedule

The following data flow is required from the SVAA 7 WD after the end of each calendar month to support the construction of the Output Data Schedule.

- Suppliers Start Trading/Cease Trading in GSP Group: To identify which Suppliers are trading in which GSP Group with a start effective date and if they have ceased trading in the GSP Group, an end effective date – P0127001.

5.11 Other Data Provision

The PARMS system will support SP01 and SP02, as follows:

Serial SP01 – Delivery of Routine Performance Reports:

This will be calculated automatically by PARMS².

Serial SP02 – Delivery of Routine Performance Logs:

Total number of days late per Supplier (for all requested logs and all relevant GSP Groups) for the previous reporting period. Timescales for receipt of Routine Performance Monitoring Logs are agreed with the PAA.

² Data Providers are asked to note the provisions for deemed receipt of email communications as set out in Section H of the BSC, and are advised to send Routine Performance Reports by 1600 hours in order to ensure their delivery to PARMS by 1700 hours. Reports sent after 1600 hours and delivered by 1700 hours will still be processed as having been submitted on that working day. However, any Data Provider sending a Routine Performance Report after 1600 hours will bear the risk of its non-delivery by 1700 hours – and therefore the risk of the report being automatically processed by PARMS as a late submission.

5.12 Validation and Completeness Rules

This section of the BSC Procedure contains the rules associated with the checking of data validity and completeness.

The data provided to PARMS will be **validated** to determine if:

- (a) data provided by authorised person (valid Email address)
- (b) all report details complete
- (c) all data type and value sets are consistent with format agreed in standard template.

If anomalies are discovered, or if additional data is required, the PAA will request additional or replacement data.

The PAA will maintain an output data schedule that will specify the report type and content for each category of data provider. A **complete** set of data reports is defined as:

- all the output data provided by a particular data provider for a Supplier and its Agents operating in a single GSP Group, where appropriate, for a reporting month in accordance with the output data schedule.

If the completeness check fails then Output Data will only be passed for further processing where it is complete for a Serial. Thus, if any element of the data which applies to a single Serial for one Agent working for one Supplier in a single GSP Group is incomplete, then all data for that Serial for that Agent working for that Supplier in that GSP Group is not passed for further processing.

PARMS will run with all Complete Data even if it is currently being queried.

The Output Data is validated against the data format requirement as defined in the standard template (or as agreed with PAA for Ad-hoc and Drill Down data) and any codification is validated against the MDD and Supplier Data Provider Information.

If re-submission is required, the total set of data for the Data Provider for the relevant Serial is required.

If the PAA amends data, an audit log of the amendment will be generated by PARMS. A copy of this audit log will be sent to the PAB and any affected Data Provider (if the Data Provider is Supplier Agent then both Supplier Agent and associated Supplier will be informed).

SVAA Data used for Peer Comparison

SVAA sourced data which is to be used for Peer Comparison and Supplier Charges (SC) purposes will be copied to the relevant Supplier for checking.

The Supplier is invited to approve the data or raise a query within the given timescales. If no response is received, it will be assumed that the data has been cleared for use.

In the event that a Supplier queries peer comparison/SC data and the PAA/Supplier/SVAA cannot agree ahead of the timetabled production of the Peer Comparison/SC reports, the PAA will take instruction from the PAB to either:

- (a) Exclude the Supplier from all Peer Comparison/SC reports for that quarter;
- (b) Exclude the Supplier from the Peer Comparison/SC report to which the queried data relates;
- (c) Include the Supplier in all Peer Comparison/SC reports anyway.

5.13 Consolidated PARMS Report

PARMS will produce one Consolidated PARMS Report for each Supplier, and Meter Operator (where relevant), detailing all validated and processed data pertaining to that Supplier or Meter Operator for each Reporting Period. This report shall be generated 25 WD after the end of each Reporting Period. A copy of the Consolidated PARMS Report is detailed in section 7.5.

5.14 Monitoring & Reporting

The PAA will run routine monthly reports that will support the analysis of:

- the performance of Suppliers (Serials SP01 and SP02);
- trends in those PARMS reports that are stated in this BSCP.

These routine monthly reports will form the basis of a monthly PARMS data report that will be produced by the PAA for review by the PAB (as detailed in section 4.1). The PARMS data report will include a summary and analysis of that information provided in the routine monthly report, including consideration of the trends in performance and market indicators over any reporting period that is specified by the PAB. Any unusual occurrences/anomalies/areas of concern will be highlighted to the PAB.

The PAA will maintain a log of reports despatched to other parties, and must record the despatch and receipt dates for confidential and/or commercially sensitive reports.

5.15 Peer Comparison Serials & Standards

The Peer Comparison Technique will apply to the following serials and standards (as defined within the PARMS Calculation Guidelines). The PAB will determine those PARMS Serials to be included in the Public and Quarterly Peer Comparison Reports and as per sections 4.2 and 4.3.

5.16 Peer Comparison Report Distribution and Publication

5.16.1 PAA Distribution of Peer Comparison Reports

PARMS will distribute Peer Comparison Reports as follows:

Recipient	Content
Panel	All reports (upon request)
PAB	All reports
Suppliers	All reports (except CM01 and CM02)
Suppliers' Agents	Respective Agent report (where Agent appears on the graph)
BSC Website	All reports notified to Suppliers as being subject to publication in accordance with paragraphs 4.4 and 5.16.2

5.16.2 Publication Criteria

- PAB may choose to publish all, none or some of the Serials and Standards set out within this BSCP
- PAB is not obligated to choose to publish the same subset of Serials and Standards publicly to those that are made available to the nominated recipient at each Supplier or Supplier Agent
- PAB may elect to change (in accordance with this BSCP) the subset of Serials and Standards published to highlight a specific performance issue that has been identified as requiring attention by either the BSC Auditor, the Authority, the Panel or BSCCo in accordance with Section 4.4
- PAB shall not change the subset of public Peer Comparison Reports published in order to highlight the performance of a Supplier in a month for which PAB has already seen performance data for that or any other Supplier
- Public Peer Comparison Reports shall be routinely updated - at least every two months or at another frequency determined by the PAB
- Each public Peer Comparison Report published must include the performance data of all Suppliers for which a full set of data is available across the reporting period
- The PAB shall ensure that the format of each Serial or Standard to be published is meaningful for purposes of comparing Supplier performance against that Serial or Standard. This means that the PAB shall, amongst other relevant factors, consider in relation to each Serial or Standard to be published, whether to present the data as actual results or as percentages.

5.17 Error and Failure Resolution and Escalation

Once a performance issue is identified and initial investigation undertaken, the PAA may wish to refer this matter to the PAB. The procedure for this referral and any subsequent escalation to the PAB or the Panel is in accordance with BSCP538, Error and Failure Resolution.
