1.5 Description of the Registration Route Map

This BSCP covers the registration process for new Party Applicants up to the achieved status of “Registered Party” as detailed in the Accession and Registration Route Map, Figure 1 (at end of this Section). After completing the processes in Section 4.1, a new Party registering in accordance with this BSCP will not have the ability to trade, only to receive reports from BSCCo and BSC Agents.

Trading Party or LDSO² status is awarded to a registered Party providing they have also completed other applicable registrations or Entry Processes. These processes are detailed in the following BSCPs:

[†] Following the implementation of P197 on 23 August 2007, all new SVA Party, SVA Party Agent or CVA MOA applicants will be subject to the new Qualification process set out in BSCP537. However, any applicants that have started, but have not yet completed, Entry Processes under BSCP511 or BSCP512 or the Accreditation process under BSCP531 should continue according to these processes, before being deemed as Qualified on completion. As a result, there will be a nine month transitional period where BSCP511, BSCP512 and BSCP531 will exist alongside BSCP537. From 23 May 2008, BSCP511, BSCP512 and BSCP531 will be withdrawn.

BSCP15	BM Unit Registration
BSCP20	Registration of Metering Systems for Central Volume Allocation
BSCP71	Submission of ECVNs and MVRNs [Housekeeping] [P210]
BSCP501	Supplier Meter Registration Service
BSCP509	Changes to Market Domain Data
BSCP515	Licensed Distribution

Section 1.5.1 – 1.5.2 - No changes

Amendment to Section 1.5.3: Deletion of reference to BSCP71 in the route map diagram

1.5.3 Not Shown in Route Map

Not Shown in Route Map

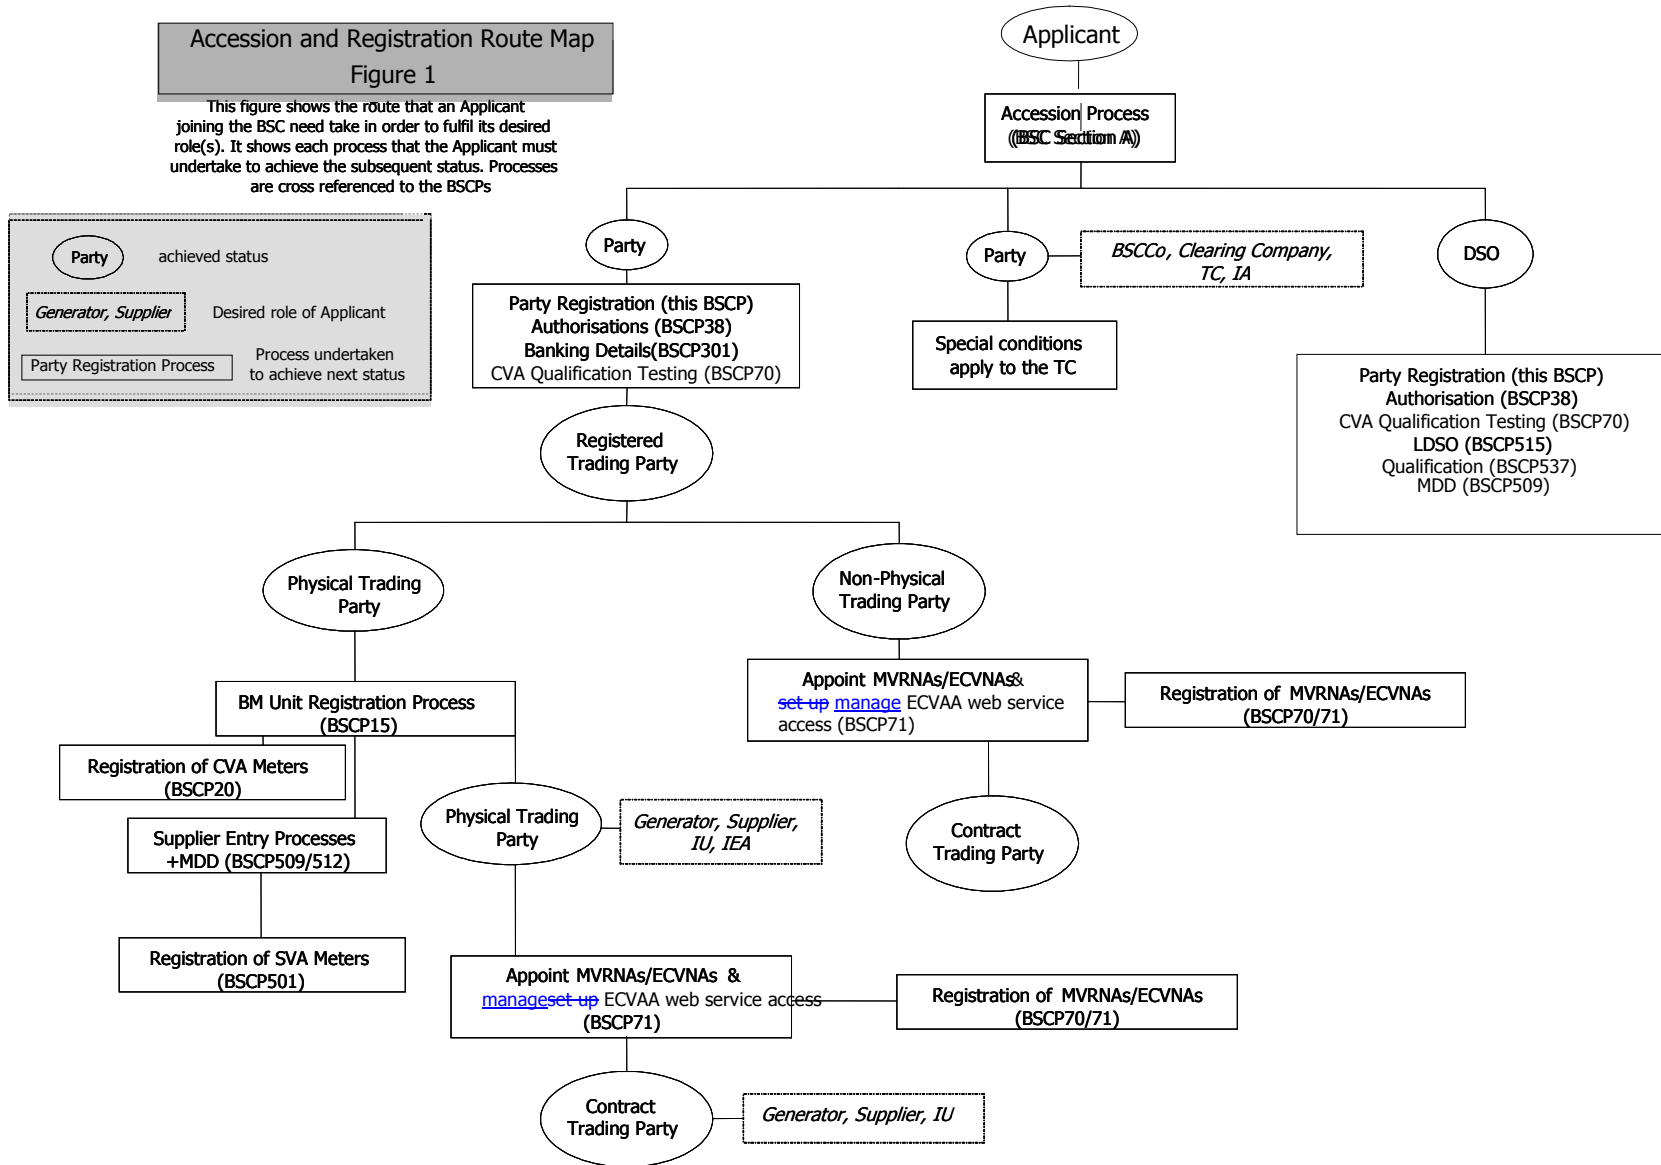

To avoid over-complication the route map does not show the options available to communicate with the Transmission Company that affect a Party's ability to submit Bids and Offers, and BM Unit Physical Notifications. These are addressed in BSCP15.

This BSCP does not indicate the timescales required to complete the associated procedures to achieve the participation capacity of a Trading Party (including a Supplier). Completion of the associated BSCPs may take between one and four months, depending on the participation capacity, the type of trading required, and the capacity and complexity of the systems being commissioned. Party Applicants should read the associated BSCPs to ensure that they begin the process sufficiently early to achieve their desired participation capacity.

² A Distribution System Operator (DSO) who is (or intends to be) the holder of a Distribution Licence is known as a Licensed Distribution System Operator (LDSO). See Appendix 1 for more detail on the difference between the two terms and the implications for BSCP65.
