<b>DESCRIPTION OF CHANGE</b> <i>(This section should set out the objective of the change and the D Flow(s) affected)</i>			
<p>This DTC CP has been raised in support of BSC CP1269 'Publication of Additional NHH Combination Data in Market Domain Data'.</p> <p>CP1269 proposes that a new entity setting out the valid combinations of MTC, LLFC, SSC and PC is included in MDD. This information would be held in the MDDM system operated by the SVAA and in order for the information to be published automatically, it would need to be included in the D0269 and D0270 flows issued to SVA participants. As a result, changes to the DTC are required.</p> <p>This DTC CP proposes to create three new data items required by the new entity. These are:</p> <ul style="list-style-type: none"> <li>• Valid MTC LLFC SSC PC Effective From Settlement Date</li> <li>• Valid MTC LLFC SSC PC Effective To Settlement Date</li> <li>• Preserved Tariff Indicator.</li> </ul> <p>These items would then be included, along with the existing Profile Class ID item, in a new data group in the D0269 and D0270 flows.</p> <p>The change would involve creating a new v004 of the D0269 and D0270 flows and decommissioning the current v003 variants. Flow Version 002 will remain in use.</p>			
<i>Proposed drafting to meet the objectives of the change should be appended to this Change Proposal.</i>			
<b>BUSINESS JUSTIFICATION FOR CHANGE</b> <i>(Issue or Problem addressed – this section must be completed)</i>			
<p>The inclusion of this data in MDD and its publication as part of the existing MDD flows would provide Suppliers with a single, up-to-date source of combination data, making registration process more efficient and helping to improve competition in supply.</p>			

<b>ASSOCIATED CHANGES</b>				
CPs for Other MRA Products impacted by this change should be listed here and progressed as related changes with this DTCCP Where BSC products are also impacted, if known, this should be noted here.				
CP1269 'Publication of Additional NHH Combination Data in Market Domain Data'.				
<b>Originator's View of Affected Organisations:</b>	Suppliers <b>Yes</b>	Distribution Businesses <b>Yes</b>	Settlements <b>Yes</b>	Others: other MDD recipients
<b>Proposed Implementation Date:</b> <i>Please see notes below</i>	Nov 09		<b>Technique: (see notes on next page for methods)</b>	
<p><b>Guidelines for suggesting implementation dates: 6 months min for changes impacting systems and software; 4 months min for changes impacting operational procedures or changes to documentation only.</b>  <i>When a decision of MDB is appealed, the elapsed time for implementation may become much shorter than anticipated due to the appeals process taking its course. Proposers may make provision for these circumstances by stating that the implementation date should be a minimum lead-time from the date of acceptance. (NB MDNS Upgrades occur in February, June, November)</i></p>				
<b>Techniques</b>				
<b>Big Bang</b> - This is the default implementation method. Participants to implement change <u>on</u> the Implementation Date				
<b>Optional</b> - Participants can implement at any time <u>from</u> the Implementation Date, as agreed between parties				
<b>Parallel Test</b> - Participants to <u>test from</u> Parallel Test Start Date as agreed between parties. Participants to implement change <u>on</u> Implementation Date. Please note that if Parallel Testing using a new Flow Version Number is Proposed, this CP needs to be accompanied by another CP to remove the old version number of the Flow.				
Parallel Test Start Date				
Parallel Test End Date: <i>(Implementation Date default is 8 months after the Parallel Test Start Date)</i>				
Value of Test Flag <i>(only to be completed if a specific test flag is required)</i>				
<b>REFERENCE TO DATA TRANSFER CATALOGUE</b>
