

Change Proposal – F40/01

CP No: 981

Version No: 2

Title *(mandatory by originator)*

Consistency change with MRA relating to timescale for Supplier registration in Supplier Meter Registration Service

Description of Problem/Issue *(mandatory by originator)*

Apply consistency changes to BSCP501 'Supplier Meter Registration Service', to reflect the requirements contained within the Master Registration Agreement (MRA), relating to the timescale by when a Supplier can register its application for a Metering System in Supplier Meter Registration Service (SMRS).

This change will affect the change of supplier, the new connection and transfer of Metering System processes within BSCP501.

Proposed Solution(s) *(mandatory by originator)*

Amend BSCP501 as follows:

1. Revise the text in the 'When' box of step 3.4.1 (of process 3.4 'Change of Supplier for Half Hourly SVA Metering System'), 3.6.2 (of process 3.6 'New Connection for SVA Metering System'), 3.7.1 (of process 3.7 'Change of Supplier or Non-Half Hourly SVA Metering System'), and 3.10.2 (of process 3.10 'New Connection for Metering System which is associated with Exemptable Generating Plant and where the Export Meter(s) is Registered in CMRS') to:

"Between SSD-28CD and SSD-1WD or where SMRA allows a registration application on SSD, on the SSD."

2. Add a linked new footnote associated with the 'When' box of step 3.4.1, 3.6.2, 3.7.1 and 3.10.2 as follows:

"Providing that the registration is received by 1800 on SSD."

Justification for Change *(mandatory by originator)*

The MRA (paragraphs 15.15 and 20.8) allows for some Supplier Meter Registration Agents (SMRAs) to accept a Supplier registration / new connection application on the Supplier Start Date (SSD), providing the registration is received by 18:00 on SSD. This is not a mandatory provision and it is a matter for the SMRA to determine whether or not they provide this service, in line with paragraph 15.5 and 20.8 of the MRA.

Implementing this change will ensure that BSCP501, which is the BSC requirements on SMRAs, reflects the requirements contained within the MRA, rather than remaining inconsistent.
