

## SVA Data Catalogue extracts showing proposed changes for CP1249

Changes redlined against SVA Data Catalogue v28.0, effective from 28 June 2008.

The data flow index in Volume 1 Appendix A of the SVA Data Catalogue should be modified as indicated below. Equivalent changes should then be made to the individual data flow entries in Appendix B.

(this flow no longer used in BSCP509)

## **Additional corrections**

### Pool Requirements of DTS

The footnote text in the entries for the P0181, P0182 and P0183 flows should be amended to remove references to 'Pool Requirements of the DTS'; the information previously contained within this document is now held in section 2.6.3 of the SVA Data Catalogue:

The [flow title] is specified in Pool Transfer File Format and will not be changed to Pool File Format before processing by Stage 2. Pool Transfer File Format (PTFF) is defined in ~~Reference 3 (Pool Requirements of the DTS, 012AAT~~[Section 2.6.3\) of the SVA Data Catalogue.](#)

### P0194 BSC Service Agent Details

A change is also required to Volume 2 of the SVA Data Catalogue to alter references to 'BSC Service Agent Details' (the title of the P0194 flow) to read 'BSC Agent Details'.
