

Change Proposal – F40/01	<p>CP No: 947</p> <p>Version No: 3.0</p>
<p>Title <i>(mandatory by originator)</i> Removal of References to Sending D0281 (BSCP508 & SVA Data Catalogue)</p>	
<p>Description of Problem/Issue <i>(mandatory by originator)</i></p> <p>The flow D0281 “Recalculated GSP Group Correction Factors Report”, sent from the SVAA to Suppliers and the Transmission Company, has become redundant.</p> <p>Under the Pool, D0281 was used to notify Suppliers and the Transmission Company of recalculated GSP Group Correction Factors following revisions to the GSP Group Take. Under NETA, changes to GSP Group Take (e.g. resulting from a dispute) are effected via Reconciliation. Therefore, now that final reconciliation of pre-NETA Settlement Days is complete, D0281 is no longer required. As a consequence, the continued compilation and distribution of D0281 gives rise to unnecessary costs.</p> <p>The issue was highlighted as part of the SVA Agent’s review of BSCP508 v7.1 for Modification P91 ‘Extension to Data Provided to the Transmission Company in the TUoS Report’. However, as the proposed change does not form part of P91 a CP needed to be raised to address the issue.</p>	
<p>Proposed Solution(s) <i>(mandatory by originator)</i></p> <p>The requirements to implement this Change Proposal are two-fold:</p> <ol style="list-style-type: none"> 1. Suppress compilation and distribution of D0281 to all recipients 2. Remove references to D0281 from BSCP508 Sections 3.2.15 and 3.3.15, the SVA Data Catalogue and the MRA Data Transfer Catalogue. <p>These requirements could be met in one of two ways:</p> <ol style="list-style-type: none"> 1. <u>Solution (A)</u>: the SVAA’s software developer could amend the software such that D0281 flows are no longer produced (and hence, no longer distributed). 2. <u>Solution (B)</u>: the SVAA could amend their operating procedures such that D0281 is no longer distributed to its current recipients. <p>The originator suggests both the proposed solutions are impact assessed to determine the most appropriate way forward.</p>	
<p>Justification for Change <i>(mandatory by originator)</i></p> <p>The flow is now redundant. Suppression of the flow, and removal of references to it in the legal framework, will increase efficiency by removing the costs associated with compiling, distributing and receiving it.</p>	

Change Proposal – F40/01	CP No: 947 Version No: 3.0
Configurable Items Potentially Affected by Proposed Solution(s) <i>(optional by Originator)</i> ⇒ BSCP508 "Supplier Volume Allocation Agent" ⇒ SVA Data Catalogue	
Impact on Core Industry Documents <i>(optional by originator)</i> MRA Data Transfer Catalogue (i.e. removal of D0281 from this document)	
Related Changes and/or Projects <i>(mandatory by BSSCo)</i> None identified	
Requested Implementation Date <i>(mandatory by originator)</i> The next suitable BSC Systems Release following the required review and impact assessment process. Reason: Timeliness and efficiency	
Agreed Release/Implementation Date <i>(mandatory by BSSCo)</i> To be confirmed	
Originator's Details: BCA Name: <i>Kathryn Coffin</i> Organisation: <i>ELEXON</i> Email Address: <i>ccc@elexon.co.uk</i> Date: <i>26 August 2003</i>
