

## Change Proposal – F40/01

CP No: 947

Version No: 4.0

**Title** (*mandatory by originator*) **Removal of References to Sending D0281 (BSCP508 & SVA Data Catalogue)**

**Description of Problem/Issue** (*mandatory by originator*)

The flow D0281 "Recalculated GSP Group Correction Factors Report", sent from the SVAA to Suppliers and the Transmission Company, has become redundant.

Under the Pool, D0281 was used to notify Suppliers and the Transmission Company of recalculated GSP Group Correction Factors following revisions to the GSP Group Take. Under NETA, changes to GSP Group Take (e.g. resulting from a dispute) are effected via Reconciliation. Therefore, now that final reconciliation of pre-NETA Settlement Days is complete, D0281 is no longer required. As a consequence, the continued compilation and distribution of D0281 gives rise to unnecessary costs.

The issue was highlighted as part of the SVA Agent's review of BSCP508 v7.1 for Modification P91 'Extension to Data Provided to the Transmission Company in the TUoS Report'. However, as the proposed change does not form part of P91 a CP needed to be raised to address the issue.

In addition to the D0281, the manual flow P0060 "Revised GSP Group Take Data File" is also a pre-NETA flow, originally sent from SAA to SVAA and is referenced in the SVA Data Catalogue. However it is now redundant, not having been used since NETA Go-Live and therefore references to it should be removed from the current Settlement documentation.

The data items 'Recalculated GSP Group Correction Factor' (J1581) and 'Revised GSP Group Take' (J1580) are specifically defined for use in the D0281 and P0060, and so have become surplus to requirements and can therefore be removed.

Formatted: No underline

**Proposed Solution(s)** (*mandatory by originator*)

The requirements to implement this Change Proposal are as follows:

1. Suppress compilation and distribution of D0281 to all recipients;
2. Remove references to D0281 from BSCP508 Sections 3.2.15 and 3.3.15, the SVA Data Catalogue and the MRA Data Transfer Catalogue;
3. Remove references to P0060 from the SVA Data Catalogue;
4. Remove the redundant data items 'Recalculated GSP Group Correction Factor' (J1581) and 'Revised GSP Group Take' (J1580) from the SVA Data Catalogue and the MRA Data Transfer Catalogue.

The suppression of the D0281 can be met in one of two ways:

1. Solution (A): the SVAA's software developer could amend the software such that D0281 flows are no longer produced (and hence, no longer distributed).
2. Solution (B): the SVAA could amend their operating procedures such that D0281 is no longer distributed to its current recipients.

Solution A is ELEXON's and the SVAA software developer's preferred method for the long term. However

<b>Change Proposal – F40/01</b>	<b>CP No: 947</b>  <b>Version No: 4.0</b>
<p>Solution B is available for use as an interim solution if required.</p>	
<p><b>Justification for Change</b> <i>(mandatory by originator)</i></p> <p>These flows are now redundant. Suppression of the D0281, and removal of references to it in the legal framework, will increase efficiency by removing the costs associated with compiling, distributing and receiving it. Removing the P0060 and the two surplus data items will maintain consistency and clarity in the legal framework, reflecting the current arrangements rather than those in effect pre-NETA.</p>	
<p><b>Configurable Items Potentially Affected by Proposed Solution(s)</b> <i>(optional by Originator)</i></p> <p>⇒ BSCP508 "Supplier Volume Allocation Agent"  ⇒ SVA Data Catalogue</p>	
<p><b>Impact on Core Industry Documents</b> <i>(optional by originator)</i></p> <p>MRA Data Transfer Catalogue (i.e. removal of D0281 and data items from this document)</p>	
<p><b>Related Changes and/or Projects</b> <i>(mandatory by BSSCo)</i></p> <p>None identified</p>	
<p><b>Requested Implementation Date</b> <i>(mandatory by originator)</i></p> <p>The next suitable BSC Systems Release following the required review and impact assessment process.</p> <p><b>Reason:</b> Timeliness and efficiency</p>	
<p><b>Agreed Release/Implementation Date</b> <i>(mandatory by BSSCo)</i></p> <p>To be confirmed</p>
