Change Proposal – F40/01		CP No: 944												
		Version No: 2.0												
Title <i>(mandatory by originator)</i> Interconnector Administrator Data Flows														
Description of Problem/ Issue <i>(mandatory by originator)</i> The Interconnector Administrator (IA) is required under the BSC to submit a file of Deemed Metered Volumes within 2 working days of the Settlement Day for the Interconnector concerned. This requires the IA to have the necessary Interconnector BM Unit Registration details. Currently there is no provision within the IDD to provide the IA with this BM Unit Registration data and therefore the IA currently relies upon the party registering the BM Units to provide the necessary information. To enable the Interconnector Administrator to fulfil its role it is important that formal notification of Interconnector BM Unit registration is provided from the Central Registration Agent (CRA). This Change Proposal seeks to address this issue by requesting that the CRA notify the relevant IA, via email, of changes to BM Unit registration details (i.e. changes to the details of existing Interconnector BM Units, details of newly registered Interconnector BM Units and de-registrations of existing Interconnector BM Units).														
Proposed Solution(s) <i>(mandatory by originator)</i> Email from the CRA to the relevant IA providing the following data for newly registered Interconnector BM Units (or any changes to such data in the case of existing Interconnector BM Units): <table><tr><td>BSC Party</td><td></td><td></td></tr><tr><td>BSC Party ID</td><td></td><td></td></tr><tr><td>Interconnector Production BM Unit ID</td><td>Registered Capacity</td><td>+ive value</td></tr><tr><td>Interconnector Consumption BM Unit ID</td><td>Registered Capacity</td><td>-ive value</td></tr></table> Effective Date In addition, the CRA shall provide the relevant IA, via email, notification of the de-registration of Interconnector BM Units and the effective date of any such de-registration.			BSC Party			BSC Party ID			Interconnector Production BM Unit ID	Registered Capacity	+ive value	Interconnector Consumption BM Unit ID	Registered Capacity	-ive value
BSC Party														
BSC Party ID														
Interconnector Production BM Unit ID	Registered Capacity	+ive value												
Interconnector Consumption BM Unit ID	Registered Capacity	-ive value												

Change Proposal – F40/01	CP No: 944 Version No: 2.0
Justification for Change <i>(mandatory by originator)</i> Currently there is no provision for the formal supply of Interconnector BM Unit registration data to the Interconnector Administrator. Provision of such information will allow the IA to update its systems and procedures and perform its duties in the timescales required by the BSC.	
Configurable Items Potentially Affected by Proposed Solution(s) <i>(optional by Originator)</i> 	
Impact on Core Industry Documents <i>(optional by originator)</i> 	
Related Changes and/or Projects <i>(mandatory by BSSCo)</i> Change required to BSCP15 to reflect this new requirement/process.	
Requested Implementation Date <i>(mandatory by originator)</i> The next suitable BSC Systems Release following the required review and impact assessment process. Reason: Timeliness and efficiency	
Agreed Release / Implementation Date <i>(mandatory by BSCCo)</i>
