

Change Proposal – BSCP40/01	CP No: 1127 Version No: 1.0
Title <i>(mandatory by originator)</i> Inconsistencies within the SVA Data Catalogue	
Description of Problem/Issue <i>(mandatory by originator)</i> It has become apparent that errors exist within the current version of the SVA Data Catalogue. Inconsistencies have been introduced between BSCP details ('Data requirement from BSC Procedure') and Tech Spec details ('Physical File Specification') due to previous inaccuracy when updating the document. For example, the BSCP details for data flow D0269 appear to have been removed as part of Modification P30. However, an investigation has revealed no indication that such removal was required.	
Proposed Solution(s) <i>(mandatory by originator)</i> The attached table describes what changes should be made to the SVA Data Catalogue to ensure accuracy and consistency with other documents.	
Justification for Change <i>(mandatory by originator)</i> Inaccuracies within the SVA Data Catalogue and inconsistency between it and other documents may lead to confusion and error within industry.

However, there is not enough associated risk to justify a release outside of the planned schedule.
