

Change Proposal – BSCP40/01	CP No: 1126 <i>Version No: 1.0</i>
Title <i>(mandatory by originator)</i> Clarification of the term “Significant Date” in the Non Half Hourly Instruction Processing Specification	
Description of Problem/Issue <i>(mandatory by originator)</i> ELEXON has identified that the examples in Section 3.1.3 in the Non Half Hourly (NHH) Instruction Processing Specification (IPS) have become unintelligible owing to formatting changes and unclear wording. The diagrams and wording in this section should be amended to clarify the meaning of the term “Significant Date” as illustrated by these examples.	
Proposed Solution(s) <i>(mandatory by originator)</i> A red-lined version of the NHH IPS is attached, which seeks to address the identified issues and clarify the meaning of “Significant Date”. Note: A number of other, purely cosmetic, changes have also been made in order to bring the document up to date.	
Justification for Change <i>(mandatory by originator)</i> CP1126 will improve the efficiency of the trading arrangements and help to promote competition in the market. The NHH IPS describes the crucial interface between a Supplier Meter Registration Service (SMRS) and NHH Data Aggregators. This interface must be documented carefully so as to ensure that every Metering System will be included in Settlement and that all consumption will be allocated to the correct Supplier. Clarifying the NHH IPS will enable market participants to develop and maintain their systems correctly in line with these industry objectives. CP1126 will also reduce future industry costs by eliminating a potential source of error.	
Is the Change being proposed a Housekeeping Change? <i>(optional by originator)</i> No. However, a number of housekeeping changes have also been included for efficiency.	
Configurable Items Potentially Affected by Proposed Solution(s) <i>(optional by originator)</i> The only expected impact is on the NHH IPS.	
Impact on Core Industry Documents or System Operator-Transmission Owner Code <i>(optional by originator)</i> None identified.	

Change Proposal – BSCP40/01

CP No: 1126

Version No: 1.0

Related Changes and/or Projects *(mandatory by BSSCo)*

ELEXON is continuing to review the Half Hourly (HH) IPS and the Multiple BM Unit IPS. However, this work is essentially independent from CP1126.

Requested Implementation Date *(mandatory by originator)*

Next suitable SVA Release.

Reason:

This is a documentation only change which seeks to improve clarity in an important area of the trading arrangements.

Agreed Release/Implementation Date *(mandatory by BSSCo)*
