

Change Proposal – BSCP40/02	<p>CP No: 1230</p> <p><i>Version No: 1.0</i> <i>(mandatory by BSCCo)</i></p>
<p>Title <i>(mandatory by originator)</i></p> <p>Movement of the functional requirements within PSL120 ‘Non Half Hourly Data Collection’ to BSCP504 ‘Non Half Hourly Data Collection for SVA Metering Systems registered in the SMRS’, following the creation of a generic non functional PSL (PSL100) via CP1182.</p>	
<p>Description of Problem/Issue <i>(mandatory by originator)</i></p> <p>The Code Subsidiary Document (CSD) review has highlighted that there is a large amount of duplication between the requirements contained in Party Service Lines (PSLs) and the corresponding Balancing and Settlement Code Procedures (BSCPs).</p> <p>During a consultation as part of the CSD review, industry participants were asked whether the functional requirements of PSLs should be merged into the appropriate BSCP and a single PSL created containing non functional requirements relevant to all Party Agents. The majority of respondents to the consultation agreed with this recommendation.</p> <p>The Panel were asked to agree the recommendations of the CSD review and the CSD Architecture Principles Document at their meeting on 8 June 2006 (Panel 115/08). The Panel agreed that a single PSL should be created containing the non-functional requirements and the functional requirements in the existing PSLs should be merged into the relevant BSCPs.</p> <p>A single generic PSL (PSL100) has been created containing participants’ non-functional requirements.</p> <p>Following on from CP1182, the functional requirements from PSL120 ‘Non Half Hourly Data Collection’ should be moved into BSCP504 ‘Half Hourly Data Collection for SVA Metering Systems registered in the SMRS’.</p>	
<p>Proposed Solution <i>(mandatory by originator)</i></p> <p>This change will remove the duplication between PSL120 and BSCP504; and will mean that Non Half Hourly Data Collectors will only have to look in one place to find the functional requirements relating to their role. This may be particularly useful to new entrants. It will also reduce the cost associated with preparing and maintaining numerous and duplicated PSLs.</p>	
<p>Justification for Change <i>(mandatory by originator)</i></p> <p>Changes should be made to BSCP504 to include all of the functional requirements currently included in PSL120, as well as a summary of the NHHDC requirements that are stated in the BSC itself. Redlining to suggest where requirements currently in PSL120 should sit within BSCP504 is attached to this CP (Attachment A).</p> <p>A housekeeping modification will be needed to update/remove references to PSL120 within the BSC before PSL120 is entirely removed. For efficiency, it is anticipated that a single housekeeping modification will be used to update all of the PSL references when all of the functional requirements in the PSLs have been moved into BSCPs.</p>	

To which section of the Code does the CP relate, and does the CP facilitate the current provisions of the Code? *(mandatory by originator)*

Annex S-2 (Supplier Volume Allocation Rules). Section 4.3 'Non Half Hourly Data Collection' has been used to draft a BSC requirement on NHHDC (Section 1.1.2 on the redlined BSCP504 CP1230 v0.3).

Yes the CP does facilitate the current provisions of the Code.

Estimated Implementation Costs *(mandatory by BSCCo)*

The estimated implementation cost is 1 ELEXON Man Day or £220.

Configurable Items Affected by Proposed Solution(s) *(mandatory by originator)*

BSCP504
PSL120
BSCP537 (v2.0) - Appendix 1 (Self Assessment Document)

Impact on Core Industry Documents or System Operator-Transmission Owner Code *(mandatory by originator)*

Any changes to the MRA Products will only be implemented when the PSLs are removed. However, impacts on the MRA Products will be identified as changes are issued for assessment. The following impacts have been identified for this CP:

- MRA Clause 29.3.3
- WP116 and WP123

Related Changes and/or Projects *(mandatory by BSCCo)*

CP1218 - 'Movement of the functional requirements within PSL 170 Meter Administrator to BSCP520 Unmetered Supplies Registered in SMRS, following the creation of a generic non functional PSL via CP1182'

CP1226 'Amendment to the 'Investigate inconsistencies' section of BSCP504 to comply with DTC configuration'

DCP0025 'Transfer of the functional requirements from PSL140 ('Non Half Hourly Data Aggregation') to the relevant BSCPs following the creation of a generic non functional PSL (PSL100) via CP1182'

DCP0026 'Transfer of the functional requirements from PSL110 ('SVA Meter Operation') to the relevant BSCPs following the creation of a generic non functional PSL (PSL100) via CP1182'

Requested Implementation Date *(mandatory by originator)*

June 2008 BSC Systems Release

Reason:

Next Available Release

Version History (*mandatory by BSCCo*)

Was previously raised as DCP0023 and has since been converted into this CP
