CHANGE PROPOSAL TITLE			
Add GSP Group information to the Data Collector / Meter Operator appointment data flow (D0155).			
DESCRIPTION OF CHANGE			
Add the Metering System's GSP Group ID (J0066) data item to the existing 'Notification of Meter Operator and Data Collector Appointment and Terms' D0155 data flow, as illustrated in the attachment. A corresponding change to the Balancing and Settlement Code (BSC) documentation is being progressed in parallel (CP941, Version 2 'Add GSP Group information to the Data Collector / Meter Operator appointment data flow (D0155)').			
Attachments Supplied?	Y		
BUSINESS JUSTIFICATION FOR CHANGE			
After the introduction of Modification Proposal P62 ("Changes to Facilitate Competitive Supply on the Networks of New Licensed Distributors"), Supplier Agents will no longer be able to determine the GSP Group from the first two digits of the Metering System's MPAN. This Change Proposal will enable Data Collectors and Meter Operator Agents to know the GSP Group location of a Metering System as soon as they first receive the appointment request from the Supplier. Although related to P62, this Change Proposal is to be progressed independently to P62 and does not require the same Implementation Date.			
IMPACT ASSESSMENT (Guidelines for suggesting implementation dates: 6 months min for changes impacting systems and software; 4 months min for changes impacting operational procedures; or 2 months min for changes to documentation only).			
Big Bang (This is the default implementation method. Participants to implement change <u>on</u> the Implementation Date)		Implementation Date (NB MDNS Upgrades occur in May, August, November, February)	February 2004 DTC release
Optional (Participants can implement at any time <u>from</u> the Implementation Date, as agreed between parties)		Implementation Date	

Parallel Test (Participants to <u>test from</u> Parallel Test Start Date as agreed between parties. Participants to implement change <u>on</u> Implementation Date. Please note that if Parallel Testing using a new Flow Version Number is Proposed, this CP needs to be accompanied by another CP to remove the old version number of the Flow.)	Parallel Test Start Date	
	Parallel Test End Date (Implementation Date default is 3 months after the Parallel Test Start Date)	
	Value of Test Flag (only to be completed if a specific test flag is required)	
Identify any organisations impacted or associated changes required.	Suppliers Meter Operators Data Collectors

						1						Service Reference
						1						Service Level Reference

Notes:

Required First Scheduled Read Date is an optional field to be used where there is a service level agreement between a Supplier and an Agent which allows the Supplier to specify the Scheduled Read Date.

This flow includes Unmetered Supply Requirements.

Though all of the address data items included in this flow are defined within the structure as being optional, the address itself is mandatory and must be included in the flow. The use of any individual address item cannot be made mandatory as, in the absence of an agreed address structure for all flows, an address may be constructed from any combination of the Address Line and Postcode items. Postcode should only be omitted if the Post Office has not generated one for the premises.
