

<b>Change Proposal – F40/01</b>	<b>CP No: 1107</b>  <b>Version No: 1.0</b>
<b>Title</b> <i>(mandatory by originator)</i>  Timescale change to the 100kW notification from Non-Half Hourly Data Collectors.	
<b>Description of Problem/Issue</b> <i>(mandatory by originator)</i>  Step 3.4.1.6 of BSCP504 (Non-Half Hourly Data Collection for SVA Metering Systems Registered in SMRS) requires the Non-Half Hourly Data Collector (NHHDC), "upon identification", to notify its Supplier of any occurrence where 100kW has been exceeded (via the P0028 100kW Demand Report).  Each respective NHHDC may therefore send this notification to the Supplier on a drip feed basis; this results in the:  a) NHHDCs sending through notifications individually; and b) Supplier continually receiving notifications.	
<b>Proposed Solution(s)</b> <i>(mandatory by originator)</i>  Simplify and streamline this process by defining a given timescale by when each NHHDC should provide such notification to its Supplier.  This CP proposes to amend the 'When' box of step 3.4.1.6 to ' <i>By 7<sup>th</sup> of each month</i> ' or alternatively ' <i>By the timescale specified by the Supplier</i> '.	
<b>Justification for Change</b> <i>(mandatory by originator)</i>  This change will result in a batched notification rather than the piecemeal obligation and therefore all those affected, can focus their efforts on this obligation at a particular timescale each month, rather than having to undertake this in an ad-hoc manner.  Applying this change will still allow sufficient timescale for the change of measurement class to be performed without unduly compromising the performance measure SP04 (Installation of Half Hourly Metering).
