

Change Proposal – F40/02 (Page 1 of 2)	CP No: 922 <i>(mandatory by BSCCo)</i>
Title <i>(mandatory by originator)</i>	
Clarification of use of data from a previous appointment by NHHDC - amendment to recent CP	
Description of Change <i>(mandatory by originator)</i>	
<p>CP768 changed BSCP504 to clarify that Change of Supplier readings (D0086 data flow) must be calculated using the historical data provided from the old NHHDC.</p> <p>This Change Proposal proposes to amend this to specify that the historical data used must be from the old NHHDC <u>immediately preceding</u> the current appointment.</p> <p>Any alternative suggestions for amending the wording below to reflect this clarification should be returned with any other response to this Change Proposal.</p>	
Proposed Solution(s) <i>(mandatory by originator)</i>	
<p>Change to redlined BSCP504 version 4.3, section 3.2.6.11 footnote 36 as follows:</p> <p>36 Where a deemed reading is to be generated for a coincident Change of Supplier and Change of Data Collector, this deemed reading must be calculated using the historical data provided by the NHHDC appointed to the MS on the SD before the Change of Supplier and Change of Data Collector.</p>	
Justification for Change <i>(mandatory by originator)</i>	
<p>BSCP504 version 4.3, agreed in SVG 22/275 for release in February 2003, requires clarification, as currently the footnote could be interpreted as meaning historical data from any previous NHHDC and not necessarily the last NHHDC.</p>	

Change Proposal – F40/01 (Page 2 of 2)	CP No: (mandatory by BSCCo)
Other Configurable Items Potentially Affected by Proposed Solution(s) (optional by BSCCo)	
Impact on Core Industry Documents (optional by originator) BSCP504
