

Change Proposal – F40/01	CP No: 894 Version No: 4
Title <i>(mandatory by originator)</i> Erroneous Registration and Change of Non Half Hourly Agent	
Description of Problem/Issue <i>(mandatory by originator)</i> If there has been an erroneous registration, paragraph 1.3.3.9 of PSL120 'Non-Half Hourly Data Collection' sets out the criteria to the use of a 1kWh advance if both Suppliers agree to do so. Criteria (c) of paragraph 1.3.3.9 states: <i>"No change in the MSID attributes of Profile Class, Non Half Hourly Data Collector, Associated Non Half Hourly Data Aggregator, Measurement Class or Standard Settlement Configuration has taken place;"</i> If there has been a concurrent Change of Supplier (CoS) and Change of Agent (CoA), then there has been no CoA SINCE the erroneous registration. Therefore, the Suppliers can still use a 1kWh advance.	
Proposed Solution(s) <i>(mandatory by originator)</i> Clarify within PSL120 1.3.3.9 that a concurrent CoS and CoA does not preclude Suppliers from using a 1kWh advance, as follows: “(c) No change in the MSID attributes of Profile Class, Non Half Hourly Data Collector, Associated Non Half Hourly Data Aggregator, Measurement Class or Standard Settlement Configuration has taken place. <u>(For the avoidance of doubt, a concurrent change of Supplier and change of Agent does not preclude Suppliers from using a 1kWh advance to make a correction if no further change to the Profile Class, Non Half Hourly Data Collector, Associated Non Half Hourly Data Aggregator, Measurement Class or Standard Settlement Configuration has taken place);</u> ”	
Justification for Change <i>(mandatory by originator)</i> A Supplier wishing to perform concurrent CoS and CoA raised the question as to why this specific requirement was not included within PSL120. Clarification is therefore proposed, making the requirements for rectifying erroneous registrations clear.
