

<b>Change Proposal – F40/02 (Page 1 of 1)</b>	<b>CP No: 860</b> <i>(mandatory by BSCCo)</i>
<b>Title</b> <i>(mandatory by originator)</i> Clarification of the use of D0150 'NHH Meter Technical Details' in PSL110 'SVA Meter Operation'.	
<b>Description of Change</b> <i>(mandatory by originator)</i> An inconsistency exists in PSL110 'SVA Meter Operation' as the frequency details in Sections 5.2.12 and 5.2.13 are different for the D0149 'Notification of Mapping Details' and D0150 'NHH Meter Technical Details' dataflows, despite the fact that they are almost always sent concurrently. The text in the 'Frequency' field for the D0150 dataflow details the triggers which cause this dataflow to be sent, but is not conclusive and is therefore unclear. This CP therefore proposes to remove this inconsistency in PSL110.	
<b>Proposed Solution(s)</b> <i>(mandatory by originator)</i> 1. Replace the text in the frequency part of Section 5.2.13 with 'As required' to make it consistent with the text in the frequency part of Section 5.2.12. 2. To add further clarity to Section 5.2.13, a comma should be inserted between 'Data Collector' and 'PDSO' in the 'To' field of Section 5.2.13. 3. Modify 5.2.12 so that 'manual dataflow' is removed after 'MOA' in the 'To' field.	
<b>Justification for Change</b> <i>(mandatory by originator)</i> The proposed solution will remove the lack of clarity in Section 5.2.13 of PSL110 regarding the use of the D0150 dataflow and make this Section consistent with Section 5.2.12.	
<b>Other Configurable Items Potentially Affected by Proposed Solution(s)</b> None	
<b>Impact on Core Industry Documents</b> <i>(optional by originator)</i> None	
<b>Related Changes and/or Projects</b> <i>(mandatory by BSCCo)</i> None
