

Change Proposal – F40/02 (Page 1 of 2)	CP No: 846 (mandatory by BSCCo)
Title (mandatory by originator) Clarifications to Flexible Reporting in BSCP41	
Description of Change (mandatory by originator) Changes are required to BSCP41 'Report Requests and Authorisation' in order to clarify processes and terminology that are causing confusion to participants. Release 2 of the BSC Systems Delivery Programme, implemented in August 2002 has introduced new concepts in flexible reporting such as flow versioning. However, some areas of confusion still remain, particularly in the use of the forms by participants and in the terminology contained in BSCP41.	
Proposed Solution(s) (mandatory by originator) The changes required have been included in a redlined attachment to this CP and are based upon BSCP41 v4.0, which is the version effective from 13 August 2002.	
Justification for Change (mandatory by originator) The changes will help to clarify confusing terminology and give a better understanding to participants about the operational procedures for flexible reporting.	
Change Proposal – F40/01 (Page 2 of 2)	CP No: (mandatory by BSCCo)
Other Configurable Items Potentially Affected by Proposed Solution(s) (optional by BSCCo) None	
Impact on Core Industry Documents (optional by originator) None	

Related Changes and/or Projects *(mandatory by BSCCo)*

Release 2 of the BSC Systems Delivery Programme became effective on 13 August 2002 and implemented flow versioning in BSCP41.

CP583 was raised to clarify and improve BSCP41 but has been superseded by the changes in Release 2 and those proposed in this CP.
