

<b>Change Proposal – F40/01 (Page 1 of 2)</b>	<b>CP No: 831</b> <i>(mandatory by BSCCo)</i>
<p><b>Title</b> <i>(mandatory by originator)</i> Amend 'Meter Type' definition where a pre-payment meter is used as a credit meter.</p>	
<p><b>Description of Change</b> <i>(mandatory by originator)</i> CP760 (Identification of Prepayment Meters within the D0150 'Non Half Hourly Meter Technical Details' dataflow) was raised to modify the BSC SVA Data Catalogue to describe how the 'Meter Type' data item (J0483) should be populated. The changes proposed via CP760 do not explicitly cover the instance where a pre-payment meter is being used as a credit meter, so a further amendment to the BSC SVA Data Catalogue is required to indicate how 'Meter Type' should be populated in this circumstance.</p> <p>This CP does not replace CP760, but is an enhancement to it.</p>	
<p><b>Proposed Solution(s)</b> <i>(mandatory by originator)</i></p> <p>The following changes are required to the BSC SVA Data Catalogue Volume 2:</p> <p><b>Meter Type</b></p> <p><b>Description:</b> Identifies the type of Non Half Hourly Meter.  <b>Units:</b> None  <b>Valid Set:</b> As Valid Set  K for a Key meter;  S for a Smart meter;  T for a Token meter; and  N for a standard credit Non-Half Hourly meter.  <b>Domain:</b> Text  <b>Logical:</b> CHAR(1)  <b>Default:</b> Not required  <b>Acronym:</b>  <b>Notes:</b> <a href="#">1) J0483</a>  <a href="#">2) <u>Where a meter with pre-payment capability is in use as a credit meter, this data item must be populated by the MOA with the value 'N'.</u></a></p>	
<p><b>Justification for Change</b> <i>(mandatory by originator)</i> A change is required to ensure that the BSC SVA Data Catalogue identifies the population rules in the specific situation where a pre-payment meter is being used as a credit meter. In addition this CP mirrors the change proposed to the MRA Data Transfer Catalogue (DTC CP3147); thereby retaining consistency with the MRA. This change would clarify the situation regarding the use of the 'Meter Type' data item within the D0150 dataflow.</p>	

<b>Change Proposal – F40/01 (Page 2 of 2)</b>	<b>CP No: 831</b> <i>(mandatory by BSCCo)</i>
<b>Other Configurable Items Potentially Affected by Proposed Solution(s)</b> <i>(optional by BSCCo)</i> None.	
<b>Impact on Core Industry Documents</b> <i>(optional by originator)</i> MRA DTC CP3147 (Amend Annex C entry for D0150 where a PPM is used as a Credit Meter) is progressing equivalent changes to the Data Transfer Catalogue, with a proposed implementation date of November 2002.	
<b>Related Changes and/or Projects</b> <i>(mandatory by BSCCo)</i> CP760, if approved for implementation will introduce the 'Meter Type' definition into the BSC SVA Data Catalogue. This CP is therefore dependent on CP760 being implemented.
