

<b>Change Proposal – F40/01 (Page 1 of 2)</b>	<b>CP No: 792</b> <i>(mandatory by BSCCo)</i>
<p><b>Title</b> <i>(mandatory by originator)</i></p> <p>Add the MOA as a recipient of D0148 'Notification of Change to Other Parties' dataflow for a change of MOA to the relevant Code Subsidiary Documents.</p>	
<p><b>Description of Change</b> <i>(mandatory by originator)</i></p> <p>PLS110 section 5.2.11 explains that the D0148 'Notification of Change to Other Parties' dataflow is sent from Suppliers to MOAs when there is a change of Data Collector. However, this dataflow is also required to be sent when there is change of MOA (both Half Hourly and Non Half Hourly) but this is not reflected in PLS110 nor is it accurately reflected in the BSC SVA Data Catalogue.</p> <p>This CP is raised from SIR R2658 'NHHMO added as a recipient of D0148 "Notification of Change to Other Parties" '.</p> <p>The Data Transfer Catalogue already supports this interface.</p>	
<p><b>Proposed Solution(s)</b> <i>(mandatory by originator)</i></p> <p>Revise section 5.2.11 of PLS110 by adding a new frequency of 'When Meter Operator Agent is to be appointed'.</p> <p>In addition add the Supplier to MOA interface to the D0148 dataflow structure within the BSC SVA Data Catalogue with the source being PLS110. Currently only the Supplier to Half Hourly MOA interface is supported by the BSC SVA Data Catalogue with the source being BSCP502.</p>	
<p><b>Justification for Change</b> <i>(mandatory by originator)</i></p> <p>This change is required in order that the old MOA will know who the new MOA is, so that the old MOA can pass on meter history to the new MOA. Without such information, the old MOA cannot pass on any historic meter data and instead the Supplier would need to be contacted for assistance. The proposed change would help to clarify the process for MOAs and is consistent with the Data Transfer Catalogue.</p>	
<p><b>Other Configurable Items Potentially Affected by Proposed Solution(s)</b> <i>(optional by BSCCo)</i></p> <p>None.</p>
