<p>Title <i>(mandatory by originator)</i> Suppression of Elexon Exception Reports</p>	
<p>Description of Change <i>(mandatory by originator)</i></p> <p>Elexon is receiving repeated SAA Data Exception Reports (SAA-I017) which are causing an overload on Elexon processing, as Elexon business procedures requires inspection of each such exception dataflow manually within the Formfill product. There is no obligation on Elexon to receive or process these SAA Data Exception Reports (SAA-I017), therefore they are considered unnecessary at this time.</p>	
<p>Proposed Solution(s) <i>(mandatory by originator)</i></p> <p>The generation of SAA Data Exception Reports (SAA-I017) to Elexon should be suppressed by 'switching off' these Exception Reports to Elexon as a recipient. It should be noted that the 'switching off' of these reports should utilise the same functionality as that defined in BSCP41 (Report Requests and Authorisation) and that therefore Elexon have the option to 'enable' receipt of these exception reports at a future date if so required, (by submission of the BSCP41/1 Form 'Changes to Individual Reporting Requirements').</p> <p><i>It should be noted that this Change Proposal formalises workaround 11 (W011) and that therefore W011 can be replaced by implementation of this change proposal. This Change Proposal also addresses NETA Issue 118.</i></p>	
<p>Justification for Change <i>(mandatory by originator)</i></p> <p>Elexon is receiving voluminous SAA Exception Reports (SAA-I017) which overload Elexon business processes, due to Elexon's business process of manually inspecting each exception report in Formfill. Therefore as there is no obligation on Elexon to receive and process the SAA Data Exception Reports, these can be 'switched off' until such a time that Elexon deem them to be required.</p>
