<b>Change Proposal – F40/01 (Page 1 of 2)</b>	<b>CP No: 641</b> <i>(mandatory by BSCCo)</i>
<b>Title</b> <i>(mandatory by originator)</i> Enduring Process to replace W021 – CRA Registration Details to NGC	
<p><b>Description of Change</b> <i>(mandatory by originator)</i></p> <p>CRA-I020 (R0201) is sent from the CRA to Elexon and the SO but its IDD description has been interpreted differently by the two participants from Logica's intention. NGC require the current Trading Unit - BM Unit association, which is not adequately included on the CRA-I020. ELEXON require substantially different information and formatting to that carried by CRA-I020.</p> <p>CRA-I020 should provide details of changes to the association of BM Units to Trading Units, by specifying the 'Trading Unit Name' for each BM Unit in group 'BR3'. However, the 'Trading Unit Name' is the Trading Unit that the 'BM Unit' was associated with as at the 'effective from date' of the BM Unit (and associated parameters), the penultimate item in the group. The 'Trading Unit Name' could therefore be null if the BM Unit was established before it was associated with a Trading Unit. This means that even if the BM Unit association has changed, it would not be reported in this flow, unless a BM Unit parameter, such as GC or DC, has also changed.</p> <p>Discontinue sending the flow to ELEXON, its use will be superseded, as currently, by the formalisation of workaround W016. See separate CP.</p>	
<p><b>Proposed Solution(s)</b> <i>(mandatory by originator)</i></p> <ol style="list-style-type: none"> <li>1. Send the existing CRA-I020 to the SO only (and not to Elexon.) <ol style="list-style-type: none"> <li>a. Add a note to the description of the CRA-I020 to clarify the usage of the BM Unit 'Effective From Dates' and 'Effective To Dates' within the flow. Specifically: <p>Version 3.6 of the "Interface Definition and Design – Part2" requires the following changes: Section 4.5, page 3, add the following paragraph after "The first field of each record ... c) not changed":</p> <p>"The 'Effective from Date' and 'Effective To Date' in the BM Unit Registration Group (BR3) are defined as the dates between which the BM Unit and all associated parameters within the group are valid. For example, if a CRA-I029 is received stating that a new Transmission Loss Factor (TLF) for a BM Unit will be effective from 1-Aug-2001, the BM Unit Registration Group will include the original record for that BM Unit but with the BM Unit 'Effective To Date' set to '31-Jul-2001', as well as a new record with the changed TLF parameter and an 'Effective From Date' of '1-Aug-2001'. Records which have an 'Effective To Date' which is in the past are not included in the flow."</p> </li> <li>b. This flow should also contain the Trading Unit Name to which a BM Unit is currently assigned and should be sent to the SO if and when this association changes, providing details of the new Trading Unit to which the BM Unit is assigned. It should be ensured that the Trading Unit to which a BM Unit is associated should always be on this flow. A full refresh report should also be available upon request.</li> </ol> </li> </ol>	

**Justification for Change** *(mandatory by originator)*

This process is intended to be the enduring process for Workaround W021 and addresses parts 2 and 3 of NCR358. The justification for implementing this process is to maintain the integrity of Settlements and to allow the SO to meet their obligations under the BSC.

**Other Configurable Items Potentially Affected by Proposed Solution(s)** *(optional by BSCCo)*

The proposed changes will require amendments to the CRA software to include the Trading Unit data on the CRA-I020. It is proposed to formally build this requirement into the CRA software.

**Impact on Core Industry Documents** *(optional by originator)*

The following documents will be impacted by these changes:

1. NETA Data File Catalogue;
2. Interface Design Document – part 2;
3. CRA User Requirements Specification;
4. CRA System Specification.

**Related Changes and/or Projects** *(mandatory by BSCCo)*
