Change Proposal – F40/01 (Page 1 of 2)	**CP No: 631** *(mandatory by BSCCo)*

Title *(mandatory by originator)* **Amendment to BMRA URS**

Description of Change *(mandatory by originator)*

Inconsistency 264 BSC_Q / URS_BMRA, Inconsistency 265 BSC_Q / URS_BMRA & Inconsistency 266 BSC_Q / URS_BMRA

The Code Section Q 6.1 Submission of data to the BMRA and BMRA URS BMRA-I003 version 2.3 use different terminology to reference the same data item:

- Code Section Q 6.1.2 (b) uses "national Generating Plant Demand Margin" compared with the BMRA URS BMRA-I003 that uses "National Demand Forecast Week".
- Code Section Q 6.1.3 uses "peak National Demand forecast" compared with the BMRA URS BMRA-I003 that uses "National Demand Forecast Day".
- Code Section Q 6.1.4 uses "peak National Indicated Margin" compared with the BMRA URS BMRA-I003 that uses "National Margin Forecast, 2-14".

Inconsistency 268 BSC_Q / URS_BMRA

The times when data is sent from the Transmission Company to BRMA are stated in the Code Section Q 6.1.7. These times should be replicated in Appendix C of the BMRA, however the BMRA URS makes no reference to the 1600 transmission.

Proposed Solution(s) ***(****mandatory by originator)*

Inconsistency 264 BSC_Q / URS_BMRA, Inconsistency 265 BSC_Q / URS_BMRA & Inconsistency 266 BSC_Q / URS_BMRA

BMRA URS version 2.3 should be altered to reflect the terms used in Section Q of the Code. To cover any possible confusion over the appearance of new terminology, both terms should be included in the URS.

- Amend BMRA-I003 so it reads "national Generating Plant Demand Margin (previously known as 'National Demand Forecast Week')"
- Amend BMRA-I003 to read "peak National Demand Forecast (previously known as 'National Demand Forecast Day')"
- Amend BMRA-I003 to read "peak Indicated National Margin (previously known as 'National Margin Forecast, 2-14')"

Inconsistency 268 BSC_Q / URS_BMRA

Update BMRA URS to reference the 1600 transmission of data from the Transmission Company to the BMRA.

Justification for Change *(mandatory by originator)*

To remove inconsistencies between the BMRA URS and section Q of the BSC Code.

Other Configurable Items Potentially Affected by Proposed Solution(s) *(optional by BSCCo)*
Impact on Core Industry Documents *(optional by originator)* BMRA Documentation
Related Changes and/or Projects *(mandatory by BSCCo)*
