

CP Form

Change Proposal – F40/02 (Page 1 of 2)	CP No: 737 <i>(mandatory by BSCCo)</i>
Title <i>(mandatory by originator)</i>	
Volume restriction on use of 1kW advance for erroneous transfers.	
Description of Change <i>(mandatory by originator)</i>	
Removal of the current restriction in PSL120 that the nil-advance erroneous transfer procedure can only be applied when less than 100 metering points have been erroneously registered on a single day.	
Proposed Solution(s) <i>(mandatory by originator)</i>	
Removal of the current restriction in SL120 that the nil-advance erroneous transfer procedure can only be applied when less than 100 metering points have been erroneously registered on a single day.	
Justification for Change <i>(mandatory by originator)</i>	
<p>This restriction should be removed for the following reasons:</p> <ul style="list-style-type: none"> i) Suppliers are not enforcing this condition at present; ii) It has no impact on the integrity of settlements; iii) It does not reflect the volumetrics of the competitive market. iv) It penalises larger suppliers who are regularly registering many thousands of metering points per day. For many Suppliers, even a very small percentage of these being erroneous (often through no fault of the supplier) would exceed the limit of 100.
