<p>Title <i>(mandatory by originator)</i></p>	
<p>SAA-I014: Denominator Value in Residual Cashflow Reallocation Proportion Calculation</p>	
<p>Description of Change <i>(mandatory by originator)</i></p>	
<p>The Total System Period Credited Energy Volume data item ($\sum_{ia} QCE_{iaj}$) (N0229) in SAA-I014 was originally intended to report on the denominator value of the Residual Cashflow Reallocation Proportion (RCRP) calculation. The denominator value has subsequently been changed and incorporated in the relevant SAA system calculation. However, the change has not been made to the data item in the relevant data flow and therefore the SAA-I014 does not contain the requisite denominator value.</p>	
<p>NCR 293 describes a method for calculating the denominator value until this change is implemented.</p>	
<p><i>This CP has been raised from NCR352</i></p>	
<p>Proposed Solution(s) <i>(mandatory by originator)</i></p>	
<p>A consultation exercise in January 2001, determined that the preferred resolution was the replacement of the data item. Therefore it is proposed that the Total System Period Credited Energy Volume ($\sum_{ia} QCE_{iaj}$) data item be replaced accordingly:</p>	
<p>A new data item should be created for the newly calculated denominator value, i.e. Data Item 'RCRP Denominator Value', calculated as $\sum_a \{ \sum_i^+ (QCE_{aij}) + \sum_i^- (-QCE_{aij}) \}$.</p>	
<p>This new data item should replace Data item N0229 (Total System Period Credited Energy Volume) in Group SSD 'System period Data' in all variations of the SAA-I014 report (i.e. all subflows).</p>	
<p>Justification for Change <i>(mandatory by originator)</i></p>	
<p>To reflect the original reporting requirement in the Settlement Report.</p>	
<p>Other Configurable Items Potentially Affected by Proposed Solution(s) <i>(optional by BSCCo)</i></p>	
<p>The Interface Design Definition and the NETA Data Flow Catalogue will both be impacted by this amendment to data items in the SAA-I014. Other SAA specification documentation may require associated amendment.</p>	
<p>Impact on Core Industry Documents <i>(optional by originator)</i></p>	
<p>None</p>	
<p align="center">Change Proposal – F40/01 (Page 2 of 2)</p>	<p>CP No: <i>(mandatory by BSCCo)</i></p>

Related Changes and/or Projects (*mandatory by BSCCo*)

Implemented NCR 293 defines the requirement for a longer term solution and also details the methodology that a recipient of the interface can utilise to obtain a value for the RCRP Denominator.
